and marketing in the region *National Competitive Advantage Amid Rapid Global Transformation* Christiansen, Bryan, Zhuplev, Anatoly, 2025-11-06 In an era of technological advancement shifting geopolitical landscapes and evolving economic models national competitive advantage is being redefined Countries must navigate complex global transformations that impact supply chains labor markets business innovation and regulatory frameworks Nations that prioritize adaptability invest in human capital and foster innovation are better positioned to improve their economic standing Understanding how to build and sustain competitive advantage amid global disruption is critical for policymakers businesses and institutions seeking long term success *National Competitive Advantage Amid Rapid Global Transformation* explores national competitive advantage in an era of rapid global hypercompetition and transformation It examines how countries can enhance their economic capabilities and maintain their position in an increasingly interconnected world This book covers topics such as human capital manufacturing and supply chains and is a useful resource for business owners government officials policymakers economists academicians researchers and scientists *Smart Organizations in Industry 5.0* Sebastian Saniuk, Sandra Grabowska, Anna Adamik, 2024-12-31 The Fourth Industrial Revolution means the widespread digitization of economic processes using more economical and efficient production technologies Orientation towards productivity flexibility and low production costs results in a slow process of dehumanization of industry and focus only on implementing digital technologies of Industry 4.0 A natural consequence of this trend is the concern of workers governments and societies about new challenges and the role of humans in industry and the economy The hope is the emergence of a new industry concept proposed by the European Commission that expands the features of the existing Industry 4.0 concept to include human centric environmental and resilience aspects in smart organizations Industry 5.0 is an excellent alternative to the development of today's digital and dehumanized world and this book presents challenges and priority directions for smart organizations in an environment shaped by the pillars of Industry 5.0 This research volume discusses the development of technologies that support human oriented work systems sustainable production and system resilience in intelligent organizations It presents an educational challenge for universities and vocational schools in preparing employees for intelligent organizations and will be of interest to researchers academics policymakers and students in the fields of organizational studies knowledge management and the digital economy *Education in the Structure of the Social and Investment Model of Economic Growth: Scenarios of Development and Mechanisms of Management* Elena G. Popkova, 2024-08-12 The importance of the formation of a socially oriented market economy grew due to the adoption of the global goals in the sphere of sustainable development For practical implementation of this idea in the modern economic systems there is a necessity for a new social and investment model of economic growth The essence and the main difference of this model from the traditional model of economic growth are the sources of growth are social investments investments in humans and an increase in the population's quality of life *End-to-End Strategy Execution* Charles F. Bowman, William M.

Ulrich,2025-12-10 Despite technological and methodological advancements strategy execution failure remains alarmingly common Most projects fail outright or face significant challenges a statistic that has remained consistent for more than two decades While 80% of business leaders believe their companies excel at crafting strategy only 44% believe their organizations can achieve their strategic goals Nine out of ten leaders admit their execution failures have resulted in missed market opportunities These initiatives that fell short of expectations and ROI have wasted hundreds of billions of dollars Organizations continue this cycle of failure by repeatedly investing in new methodologies third party software systems integrators or silver bullet technologies expecting different results This suggests a fundamental abdication of ownership and responsibility for effective strategy execution Too many organizations fall into the trap of blind loyalty to specific methodologies sometimes abandoning proven practices and even strategic planning itself While various methodologies offer valuable elements leadership must maintain intellectual oversight rather than delegating accountability to third parties with limited stake in long term success End to End Strategy Execution From Inception Through Solution Deployment presents a framework for change to break this cycle of failure This framework is effective because it is methodology agnostic but not methodology illiterate This means it incorporates valuable elements from various approaches while maintaining a cohesive structure that connects strategy formulation to solution deployment This end to end strategy execution framework provides an actionable roadmap covering Strategy formulation Impact assessment Business and IT architecture design Initiative scoping and prioritization Design driven solution deployment Unlike previous frameworks claiming to be end to end this approach incorporates the rigor and integration capabilities needed to deliver on its promise aligning best practices and technologies to streamline every action from strategy to implementation Because the framework addresses every aspect of strategy execution this book is a must read for everyone involved in strategy formulation analysis design and deployment It enables all strategic stakeholders and contributors to understand the scope and extent of their responsibilities as well as the tasks required to deliver any strategic solution on time and within budget

Political ecologies of the far right Irma Kinga Allen,Kristoffer Ekberg,Ståle Holgersen,Andreas Malm,2024-05-28 This volume engages with the alarming convergence of far right thinking and the ecological crisis in contemporary society Growing out of the first international conference on political ecologies of the far right the volume gathers crucial insights from authorities in the field as well as promising early career researchers With cases ranging from ethnographical accounts of fossil fuel populist protest historical analysis of the evangelical support for fossil fuels to interrogations of the settler colonial identities and material conditions defended by far right actors around the world the book provides scholars students and activists with ways to understand and counter these developments An electronic edition of this book is freely available under a Creative Commons CC BY NC ND licence
