Emotional Data Applications and Regulation of Artificial Intelligence in Society Rosa Ballardini, Rob van den Hoven van Genderen, Sari Järvinen, 2025-01-22 This revolutionary new book on using AI to process human emotion data seeks to raise awareness for the topic thoroughly discuss it from a multidisciplinary perspective and by doing so disseminate research findings that elaborate on the current and future regulatory needs for the responsible and ethical development and application of emotional AI Biometric and psychological data of humans are the most sensitive data on human behavior The book's objective is to provide a holistic understanding of key challenges and propose novel workable substantive and methodological solutions for navigating current and future legal and ethical needs and dilemmas regarding the processes of developing and using emotional AI Although both the academic community and political decision makers continue to

intensively discuss issues in the ethical regulation of AI there is still a very limited understanding of both the opportunities and the risks in connection with emotional AI specifically Yet emotional AI is one of the most promising areas of AI developments and applications Several of these innovations could be a welcome change in our society as they could improve our well being in various ways That being said these inventions require considerable investments Thus legal incentives such as IPRs are crucial to supporting investment in these fields Further these innovations might have negative effects on the privacy and autonomy of natural persons raising both legal and ethical concerns Thus their legal and ethical acceptability as well as their societal acceptance might be challenged by several legal provisions in the EU such as the GDPR regulations on communications social platforms and marketing and the draft AI Act Yet the current legal landscape for emotional AI in Europe is anything but clear an aspect that becomes even more apparent when we consider the global picture of the regulatory framework for emotional AI In this book a diverse team of internationally respected experts addresses these issues engaging in a multidisciplinary study into techno economic legal developments concerning emotional AI its impacts and the need for action The book offers in depth scientific and societally relevant insights on the past present and future of AI in general especially its many implications for law and policy Although the primary target audience for the book are academics from the field of law the book also offers sound guidance for legislators and general policymakers as well as companies and organizations

The Algorithm Hilke Schellmann, 2024-01-02 ANTHEM AWARD WINNER NAMED A FINANCIAL TIMES BEST BOOK OF THE YEAR 2024 AI is on the brink of dominating our lives threatening our privacy and human future if we don t take action now In *The Algorithm* Emmy award winning Wall Street Journal and Guardian contributor Hilke Schellmann delivers a shocking and illuminating expos on one of the most pressing civil rights issues of our time how AI has quietly and mostly out of sight taken over the world of work Schellmann takes readers on a journalistic detective story meeting job applicants and employees who have been subjected to these technologies playing AI based video games that companies use for hiring and investigating algorithms that scan our online activity to construct personality profiles including if we are prone to self harm She convinces whistleblowers to share results of faulty AI tools and tests algorithms that analyze job candidates

facial expressions and tools that predict from our voices if we are anxious or depressed Schellmann finds employees whose every keystrokes were tracked and AI that analyzes group discussions or even predicts when someone may leave a company Her reporting reveals in detail how much employers already know about us and how little we know about the technologies that are used on us The Algorithm tells an even bigger story with Schellmann discovering faulty algorithms and systemic discrimination of women and people of color which may have already harmed thousands of job seekers and employees It advocates to go beyond these tools to more thoughtfully consider how we hire promote and treat human beings with or without AI As Schellmann emphasizes we need to decide how we build algorithmic tools in any industry and what protections we need to put in place in an AI driven world Hilke Schellmann is an Emmy award winning investigative reporter and journalism professor at NYU Her work covering artificial intelligence has been published in The New York Times The Guardian the MIT Technology Review and The Wall Street Journal where she led a team investigating how AI is changing our lives She has also reported for NPR s Planet Money podcast on fake online reviews and her investigation for VICE on HBO was a finalist for a Peabody Award Her PBS Frontline documentary Outlawed in Pakistan premiered at the Sundance Film Festival and was honored with an Emmy award
