requirements for teachers were found to be essential for a 21st century skill transfer in primary schools. Such requirements include high levels of teacher agency, basic digital skills, and pedagogical/technological integration competences to take responsibility for the EdTech integration. To apply technology effectively, teachers are recommended to build their ICT self-efficacy, their own beliefs in their digital skills, on a continuous professional learning journey. To increase the latter engagement component, measures such as sharing expertise and experiences in a global teacher community, as well as proactively seeking increased collaboration with teachers and students, are recommended.

METHODS OF TEACHING APPLYING COGNITIVE SCIENCE TO PROMOTE STUDENT LEARNING helps prospective teachers learn how to apply recent findings by cognitive scientists to their classroom practices in order to promote true conceptual change among their students. The book focuses squarely on ways to bring about deep rather than surface learning to all students. The authors use and model many of the teaching strategies they present, focusing on major core concepts and utilizing a rich array of pedagogical features to help prospective teachers build a deep understanding of how people learn and what strategies they can use as teachers to help their students achieve long-lasting comprehension. Throughout the text, the authors emphasize the need to change instruction in light of new findings from cognitive science. Planning for instruction, behavior management, and technology are integrated into each chapter.
