**System-level Modeling of MEMS** Oliver Brand, Gary K. Fedder, Christofer Hierold, Jan G. Korvink, Osamu Tabata, 2012-12-20 System level modeling of MEMS microelectromechanical systems comprises integrated approaches to simulate understand and optimize the performance of sensors actuators and microsystems taking into account the intricacies of the interplay between mechanical and electrical properties circuitry packaging and design considerations Thereby system level modeling overcomes the limitations inherent to methods that focus only on one of these aspects and do not incorporate their mutual dependencies The book addresses the two most important approaches of system level modeling namely physics based modeling with lumped elements and mathematical modeling employing model order reduction methods with an emphasis on combining single device models to entire systems At a clearly understandable and sufficiently detailed level the readers are made familiar with the physical and mathematical underpinnings of MEMS modeling This enables them to choose the adequate methods for the respective application needs This work is an invaluable resource for all materials scientists electrical engineers scientists working in the semiconductor and or sensor industry physicists and physical chemists *The Foundations of Communication in Criminal Justice Systems* Daniel Adrian Doss, William H. Glover, Jr., Rebecca A. Goza, Michael Wigginton, Jr., 2014-10-17 Myriad forms of communication occur within the criminal justice system as judges and attorneys speak to juries law enforcement officers interact with the public and the news media presents stories of events in courtrooms Hindrances abound however Law enforcement officers and justice system personnel often encounter challenges that affect their ability to communicate with others ranging from language barriers to conflicting accounts of witnessed events to errors caused by malfunctioning technology Examining the relevancy of the U S Constitution to modern communications The Foundations of Communication in Criminal Justice Systems demonstrates how information is conveyed from multiple perspectives in a range of scenarios enabling readers to see how these matters relate to and affect the criminal justice system Topics covered include How to use the communications process within the justice system from the crafting of messages through the solicitation of feedback Effective methods for persuading individuals and audiences Federal regulations in the workplace and workplace communications tactics How law enforcement and public safety entities use marketing and advertising to influence the general public How to use multimedia resources when communicating Using multiple communications styles to support effective leadership The book concludes with discussions on innovations in communication technology natural language processing cybernetics and other emerging concepts With an emphasis on logical reasoning in communication the book explores the perspectives of numerous players in the justice system from patrol officers to attorneys Supplemented by examples of written communication templates that can be adapted within a law enforcement organization it provides readers with solid theoretical and applied approaches to the subject matter
