Citizens in the 'Smart City' Paolo Cardullo, 2020-09-22 This book critically examines smart city discourse in terms of governance, initiatives, citizen participation, and policies, which place emphasis on the citizen as an active recipient and co-producer of technological solutions to urban problems. The current hype around smart cities and digital technologies has sparked debates in the fields of citizenship, urban studies, and planning surrounding the rights and ethics of participation. It also sparked debates around the forms of governance these technologies actively foster. This book presents new socio-technological systems of governance that monitor citizen power, trust building, strategies, and social capital. It calls for new data economics and digital rights for a city founded on normative ideals rather than neoliberal ones. It adopts a normative approach, arguing that a reloaded smart city should foster citizenship as a new set of civil and social rights, and the citizen as a subject vested with active and meaningful forms of participation and political power. Ultimately, the book questions the utility of the smart city project for radical municipalism, proposing a technological enough but more democratic city, an intelligent city in fact. Offering useful contribution to smart city initiatives for the protection of emerging digital citizenship rights and socially accrued benefits, this book will draw the interest of researchers, policymakers, and professionals in the fields of urban studies, urban planning, urban geography, computing, and technology studies, urban politics, and urban economics.

Artificial Intelligence and Taxation Law Enrico Gallo, 2025-07-25 This book identifies how artificial intelligence (AI) systems can be used as part of decision processes within international tax and transfer pricing disputes. The issue of double taxation and its impact on economic development continues to escalate as globalization causes states to interact on a growing scale. In recent years, AI applications have shown potential to solve this issue, particularly in reference to the length of time taken to resolve cases of double taxation in the field of transfer pricing.
