Most AI systems used in medical imaging are data driven and based on supervised machine learning
Clinicians and AI specialists can contribute to the development of an AI system in different ways focusing on their respective strengths
Unfortunately communication between these two sides is far from fluent and from time to time they speak completely different languages
Mutual understanding and collaboration are imperative because the medical system is based on physicians ability to take well informed decisions and convey their reasoning to colleagues and patients
This book offers unique insights and informative chapters on the use of AI for cardiothoracic imaging from both the technical and clinical perspective
It is also a single comprehensive source that provides a complete overview of the entire process of the development and use of AI in clinical practice for cardiothoracic imaging
The book contains chapters focused on cardiac and thoracic applications as well more general topics on the potentials and pitfalls of AI in medical imaging
Separate chapters will discuss the valorization regulations surrounding AI cost effectiveness and future perspective for different countries and continents
This book is an ideal guide for clinicians radiologists cardiologists etc interested in working with AI whether in a research setting developing new AI applications or in a clinical setting using AI algorithms in clinical practice
The book also provides clinical insights and overviews for AI specialists who want to develop clinically relevant AI applications *Accounting and Auditing Research* Thomas R. Weirich,Natalie Tatiana Churyk,Thomas C. Pearson,2025-03-18 Provides clear and accessible coverage of effective research solutions in a broad range of practical applications
