diagnostic and behavioural assessment tools with animals *How to Enhance Learning Efficiency When Online Learning is Popular and Indispensable: Theory, Research and Practice* Rong Lian, Chang Liu, Juzhe Xi, 2024-07-17 Online learning has become more and more common globally whether for comfort adapting to work hours or just having the freedom to study from anywhere. And now under the coronavirus pandemic as people are having to stay at home it has become more important than ever. Although the popularity of wireless network and portable smart device makes it possible for people to acquire and learn knowledge anytime and anywhere it does not necessarily mean an increased learning performance. Relevant research in cognitive science has revealed possible limitations in online learning. For example the knowledge acquired through online learning tends to be fragmented and lacks guidance for integrated thinking among different subjects which makes it difficult for learners to form a systematic knowledge structure. Learners may experience cognitive overload, metacognitive illusion and low learning efficiency in self regulated learning. It follows that in the post COVID 19 era online learning puts forward new requirements and challenges to the contemporary students not only to their learning strategies but positive character traits in learning. Most of the current learning theories were developed in the early 20th century and may not fit in well with the current situation then possibly leading to inefficient learning and increased learning burden. Therefore it is necessary and important to reexplore the influencing factors and mechanisms that affect the learning efficiency of students at all levels nowadays based on which we could construct a theoretical model of efficient learning model Writing In-House Medical Device Software in Compliance with EU, UK, and US Regulations Philip S. Cosgriff, Matthew J. Memmott, 2024-03-26 This book is a comprehensive guide to producing medical software for routine clinical use. It is a practical guidebook for medical professionals developing software to ensure compliance with medical device regulations for software products intended to be sold commercially, shared with healthcare colleagues in other hospitals or simply used in house. It compares requirements and latest regulations in different global territories including the most recent EU regulations as well as UK and US regulations. This book is a valuable resource for practising clinical scientists producing medical software in house in addition to other medical staff writing small apps for clinical use, clinical scientist trainees and software engineers considering a move into healthcare. The academic level is post graduate as readers will require a basic knowledge of software engineering principles and practice. Key Features: Up to date with the latest regulations in the UK, the EU and the US. Useful for those producing medical software for routine clinical use.
