The Almighty Machine Pekka Vahvanen, 2022-02-25 The hymn of Digitalization is nothing new We must encourage the creation of new apps We must develop AI in order to prevail among international competition Technology's advance will halt climate change and let robots do the dumb stuff for us Our faith in technology is powerful because it has saved us in the past The Almighty Machine shows us technology's flip side The things that once powered us toward a brighter tomorrow are already undermining our quality of life The data stream has shattered our concentration human relationships have been reduced to a menu of emojis constant surveillance has nullified much of our privacy and the development of AI could be the beginning of the end for us We are becoming the casualties of our own success Pekka

Vahvanen's bristling and timely critique deftly translated by Mark Jones throws doubt on the necessity of technological development in a world saturated in tech. The Almighty Machine presents an important question: Does progress no longer make us happier?

Digital Content Marketing in the Global Environment. Evaluation of Global Companies in the Chemical Industry Matthias Hebben, 2021-04-27. Master's Thesis from the year 2019 in the subject Business economics Business Management Corporate Governance grade 2.0 University of Applied Sciences Northwestern Switzerland language English abstract: This Master thesis explores the phenomenon of Digital Content Marketing (DCM) by evaluating if content marketing and its tools have a positive impact on global companies in the chemical industry. Rapid globalization and the development of new markets at an increasingly global scale have made DCM more important. However, global companies are facing new challenges like new technological developments and trends and a changing consumer landscape that requires new marketing approaches. Strategies are required to overcome these challenges: adopt DCM techniques and use current techniques to gain competitive advantages. However, there are still companies that have not included digital content in their marketing strategy. Others have difficulties making their marketing content unique and powerful. The main issue is often measuring the effectiveness of one's digital content to determine whether DCM has a positive impact.
