How to Think about Data Science Diego Miranda-Saavedra, 2022-12-23 This book is a timely and critical introduction for those interested in what data science is and isn't and how it should be applied. The language is conversational and the content is accessible for readers without a quantitative or computational background but at the same time it is also a practical overview of the field for the more technical readers. The overarching goal is to demystify the field and teach the reader how to develop an analytical mindset instead of following recipes. The book takes the scientist's approach of focusing on asking the right question at every step as this is the single most important factor contributing to the success of a data science project. Upon finishing this book the reader should be asking more questions than I have answered. This book is therefore a practising scientist's approach to explaining data science through questions and examples.

Technology and Language Learning Eric Friginal, Wing Yee Jenifer Ho, 2025-12-22 *Technology and Language Learning: Effective Podcasting and Video Based Language Teaching Practices in the Age of Generative AI* provides English language teachers with a practical guide to integrating podcasting, video based materials and Generative AI (GenAI) technologies into their classrooms. Focused on ESL, EFL and ELT the book demonstrates how these tools enhance engagement, accessibility and autonomy while fostering skills like listening comprehension, vocabulary development and creative language use. Teachers will find strategies for using podcasts in flipped classrooms, designing authentic video activities and guiding students in creating multimodal content. The book highlights GenAI tools like ElevenLabs, Canva and Synthesia for generating adaptive, accessible materials tailored to diverse learners. Addressing challenges and opportunities it emphasizes balancing AI generated content with authentic language practice. Real world examples and case studies illustrate practical applications in culturally sensitive and inclusive ways. Whether in traditional, hybrid or online settings it offers actionable guidance for leveraging digital tools as transformative components of modern pedagogy, preparing students to thrive in a GenAI driven, globally connected world. By bridging research and practice this textbook empowers teachers and practitioners to reimagine classrooms as dynamic spaces where technology supports creativity, collaboration and critical thinking.
