Handbook of Simulation Optimization Michael C Fu, 2014-11-13 The Handbook of Simulation Optimization presents an overview of the state of the art of simulation optimization providing a survey of the most well established approaches for optimizing stochastic simulation models and a sampling of recent research advances in theory and methodology Leading contributors cover such topics as discrete optimization via simulation ranking and selection efficient simulation budget allocation random search methods response surface methodology stochastic gradient estimation stochastic approximation sample average approximation stochastic constraints variance reduction techniques model based stochastic search methods and Markov decision processes This single volume should serve as a reference for those already in the field and as a means for those new to the field for understanding and applying the main approaches The intended audience includes researchers practitioners and graduate students in the business engineering fields of operations research management science operations management and stochastic control as well as in economics finance and computer science

Service Systems Implementation Haluk Demirkan, James C. Spohrer, Vikas Krishna, 2011-02-07 Service Systems Implementation provides the latest applications and practices aimed at improving the key performance indicators of service systems especially those related to service quality service productivity regulatory compliance and sustainable service innovation The book presents action oriented application oriented design science oriented artifacts building constructs models methods and instantiations and case study oriented research with actionable results by illustrating techniques that can be employed in large scale real world examples The case studies will help visualize service systems along the four key dimensions of people information technology and value propositions which can help enable better integration between them towards higher value propositions The chapters written by leading experts in the field examine a wide range of substantive issues and implementations related to service science in various industries These contributions also showcase the application of an array of research methods including surveys experiments design science case studies and frameworks providing the reader with insights and guidelines to assist in building their own service systems and thus moving toward a more favorable service customer and provider experience Service Systems Implementation along with its companion text The Science of Service Systems is designed to present multidisciplinary and multisectoral perspectives on the nature of service systems on research and practice in service and on the future directions to advance service science These two volumes compose a collection of articles from those involved in the emerging area known as service science

Simulation Stewart Robinson, 2014-09-22 The new edition of this successful textbook provides a comprehensive introduction to simulation foregrounding the topic as an applied problem solving tool Guiding readers through the key stages in a simulation project in terms of both the technical requirements and the project management issues surrounding it the book will enable students to develop appropriate valid conceptual models perform simulation experiments analyse the results and draw insightful conclusions The author's engaging style and

authoritative knowledge of the subject make the book as accessible as it is essential drawing on case studies and complementary online content to encourage a critical engagement with the topic This is an ideal textbook for those studying on upper level undergraduate and postgraduate degree courses in business and management and MBA programmes and is a core text for those specialising in operations management In addition it is an important text for students taking Simulation modules on engineering computer science or mathematics degree programmes New to this Edition A practical step by step guide to preparing a simple model Improved cross referencing navigation and design Updated referencing and the inclusion of select new case studies New material available via the companion website Key concepts on page glossary terms and relevant further reading lists for each chapter

Handbook of Research on Natural Computing for Optimization Problems Mandal, Jyotsna Kumar, Mukhopadhyay, Somnath, Pal, Tandra, 2016-05-25 Nature inspired computation is an interdisciplinary topic area that connects the natural sciences to computer science Since natural computing is utilized in a variety of disciplines it is imperative to research its capabilities in solving optimization issues The Handbook of Research on Natural Computing for Optimization Problems discusses nascent optimization procedures in nature inspired computation and the innovative tools and techniques being utilized in the field Highlighting empirical research and best practices concerning various optimization issues this publication is a comprehensive reference for researchers academicians students scientists and technology developers interested in a multidisciplinary perspective on natural computational systems

Handbook of Research on Military, Aeronautical, and Maritime Logistics and Operations Ochoa-Zezzatti, Alberto, Sánchez, Jöns, Cedillo-Campos, Miguel Gastón, de Lourdes, Margain, 2016-02-02 Effective logistics management has played a vital role in delivering products and services and driving research into finding ever improving theoretical and technological solutions While often thought of in terms of the business world logistics and operations management strategies can also be effectively applied within the military aeronautical and maritime sectors The Handbook of Research on Military Aeronautical and Maritime Logistics and Operations compiles interdisciplinary research on diverse issues related to logistics from an inclusive range of methodological perspectives This publication focuses on original contributions in the form of theoretical experimental research and case studies on logistics strategies and operations management with an emphasis on military aeronautical and maritime environments Academics and professionals operating in business environments government institutions and military research will find this publication beneficial to their research and professional endeavors

Product Integrity and Reliability in Design John W. Evans, Jillian Y. Evans, 2001-02-28 The book develops the root cause approach to reliability often referred to as physics of failure in the reliability engineering field It approaches the subject from the point of view of a process and integrates the necessary methods to support that process The book can be used to teach first or second year postgraduate students in mechanical electrical manufacturing and materials engineering about addressing issues of reliability during product development It will also serve practicing engineers involved in the

design and development of electrical and mechanical components and systems as a reference *Management Research Methodology* K. N. Krishnaswamy, Appa Iyer Sivakumar, M. Mathirajan, 2009 The subject of management research methodology is enthralling and complex A student or a practitioner of management research is beguiled by uncertainties in the search and identification of the research problem intrigued by the ramifications of research design and confounded by obstacles in obtaining accurate data and complexities of data analysis *Management Research Methodology Integration of Principles Methods and Techniques* seeks a balanced treatment of all these aspects and blends problem solving techniques creativity aspects mathematical modelling and qualitative approaches in order to present the subject of Management Research Methodology in a lucid and easily understandable way *Discrete-event System Simulation* Jerry Banks, 2010 For junior and senior level simulation courses in engineering business or computer science *Discrete Event System Simulation* examines the principles of modeling and analysis that translate to all software tools rather than a particular software tool This language independent text explains the basic aspects of the technology including the proper collection and analysis of data the use of analytic techniques verification and validation of models and designing simulation experiments It offers an up to date treatment of simulation of manufacturing and material handling systems computer systems and computer networks Students and instructors will find a variety of resources including simulation source code for download additional exercises and solutions web links and errata at the associated website <http://dmnicol.web.engr.illinois.edu/bcnn/index.html>
