Sauer, Mary Biancalana, 2010 This book presents Sauer's trigger point therapy protocols for lumbar buttock and ilio sacral pain. These gentle techniques are easy to learn and administer at home and include compression stretching and range of motion exercises for the muscles that refer pain to the lower back and hip areas. The Trigger Point Therapy Workbook

Clair Davies, Amber Davies, 2013-09-01 Trigger point therapy is one of the fastest growing and most effective pain therapies in the world. Medical doctors, chiropractors, physical therapists, and massage therapists are all beginning to use this technique to relieve patients' formerly undiagnosable muscle and joint pain, both conditions that studies have shown to be the cause of nearly 25 percent of all doctor visits. This book addresses the problem of myofascial trigger points: tiny contraction knots that develop in a muscle when it is injured or overworked. Restricted circulation and lack of oxygen in these points cause referred pain. Massage of the trigger is the safest, most natural, and most effective form of pain therapy. Trigger points create pain throughout the body in predictable patterns characteristic to each muscle, producing discomfort ranging from mild to severe. Trigger point massage increases circulation and oxygenation in the area and often produces instant relief. The Trigger Point Therapy Workbook, Third Edition, has made a huge impact among health professionals and the public alike, becoming an overnight classic in the field of pain relief. This edition includes a new chapter by the now deceased author Clair Davies' daughter, Amber Davies, who is passionate about continuing her father's legacy. The new edition also includes postural assessments and muscle tests, an illustrated index of symptoms, and clinical technique drawings and descriptions to assist both practitioners and regular readers in assessing and treating trigger points. If you have ever suffered from or have treated someone who suffers from myofascial trigger point pain, this is a must-have book. **Pain Relief with Trigger Point**

**Self-Help** Valerie DeLaune, 2004-12 75% of pain is caused by trigger points: areas of contracted cells in muscle tissue, but they are drastically under-diagnosed as the source of pain. Trigger points may refer pain and other symptoms both in the local area and/or to other areas of the body, but since over 74% of trigger points are not located in the area where you feel pain, treating the local area does not resolve the problem most of the time. The most common referral patterns have been well documented and diagrammed over decades of research. The home page of this multi-media book on Flashdrive has a photo of a body where you can place your computer cursor over your area of pain. With a mouse click, a drop-down list of muscles that may contain trigger points appears. By clicking on the muscle, chapter links your browser takes you to each pertinent chapter. You'll find illustrations of common pain referral patterns that you can compare with where you feel pain, and this will help you figure out where the common trigger point causing your pain are located. Along with outlining the common symptoms and

causes for trigger points for each muscle the author has provided lists of helpful hints for resolving trigger points A written text describes self help techniques and you can click on an icon for a video demonstration The introductory chapters include detailed information on the physiology of trigger points general guidelines for self help techniques and descriptions of therapies that can help resolve trigger points A comprehensive chapter on factors that cause and keep trigger points activated such as nutritional problems illness misfitting furniture sleep problems hormonal imbalances joint misalignments injuries and emotional factors helps you identify things that keep your pain coming back Numerous suggestions help you resolve those factors for lasting relief This state of the art Flashdrive draws on the decades of research by Doctors Janet Travell and David G Simons combined with the 30 years of clinical experience of Acupuncturist Neuromuscular Therapist and author Valerie DeLaune LAc
