

## CAMERA SETTINGS

Camera settings are the various parameters that control the camera's operation. These settings can be adjusted to suit the photographer's needs and the specific conditions of the shoot. The most common settings are aperture, shutter speed, and ISO sensitivity. These three settings form the 'exposure triangle' and are the primary tools for controlling the exposure of a photograph. Other settings include white balance, focus mode, and image format. Understanding these settings is essential for achieving the desired creative and technical results in photography.
