Mental Health Promotion and Protection Naseem Akhtar Qureshi, Samrat Singh Bhandari, Giorgio Di Lorenzo, Harshavardhan Sampath, 2023-09-13 The WHO constitution states Health is a state of complete physical mental and social well being and not merely the absence of disease or infirmity There are multiple factors that contribute towards good mental health including civil liberties politics economics social rights and cultural diversity and quality of life of the individual and the society as a whole The promotion of mental health spans many disciplines in order to cover all these factors such as education work justice housing and welfare Therefore it is important to collaborate to create an environment that promotes and supports mental health to improve psychological well being and allow individuals to realize their own abilities work productively and contribute to society and live fulfilling lives There is no health without mental health that is vital to individuals families communities and societies across the world and so the goal of this Research Topic is to collate ideas and research of strategies for the promotion of mental health across all disciplines in order to raise awareness of mental health promotion and protection to ensure its incorporation in national mental health policies going forwards This is of particular relevance given the mental health crisis being experienced across the world right now Advanced Technologies and the University of the Future Eduardo Vendrell Vidal, Uriel R. Cukierman, Michael E. Auer, 2024-12-16 This book offers a comprehensive framework compiling solutions and evidence from various sections that illustrate how technology can shape both the learning experience and the organizational structure of higher education institutions The integration of technology in higher education including advancements such as AI large language models LLMs the metaverse and gamification techniques has sparked significant interest among academics and researchers This technological evolution is not only influencing research and teaching but is also transforming universities at every level The book envisions the university of the future providing ideas to foster collaboration and enhance research The full text is structured into 32 chapters organized into five sections each exploring different technologies that can or have been applied in higher education Extended Reality XR It includes the reality virtuality continuum which includes augmented reality AR mixed reality MR virtual reality VR haptic devices and more recently the metaverse Artificial Intelligence AI It includes everything related to the automated analysis of large volumes of information and its application in the form of learning analytics adaptive learning and automatic learning machine learning and also chatbots which have emerged into mainstream conversation due to the appearance of ChatGPT Digital Transformation DX It is understood as the possibility of taking advantage of the available technologies to change the programs and the organization of teaching and learning This subject also includes themes such as information security and privacy and open badges Gamification It refers to the incorporation of serious game elements like point and reward systems to tasks as incentives for people to participate Emerging Technologies in Higher Education It encompasses a comprehensive

spectrum spanning research endeavors application development first hand accounts and detailed descriptions of educational tools
