Emotions Online Alan Petersen, 2022-12-30 Digital media have become deeply immersed in our lives heightening both hopes and fears of their affordances. While the internet mobile phones and social media offer their users many options they also engender concerns about their manipulations and intrusions. Emotions Online explores the visions that shape responses to media and the emotional regimes that govern people's engagements with them. This book critically examines evidence on the role of digital media in emotional life. Offering a sociological perspective and using ideas from science and technology studies and media studies it explores the dimensions and operations of the online emotional economy. Growing concerns about online harms and abuse especially to children Deepfakes and other forms of image based abuse The role of hope in shaping online behaviours Digital well being and its market COVID 19's impacts on perceptions of digital media and Big Tech Growing challenges to centralised control of the internet and the implications for future emotional life. The book breaks new ground in the sociological study of digital

media and the emotions It reveals the dynamics of online emotional regimes showing how deceptive designs and algorithm driven technologies serve to attract and engage users As it argues digital media rely on the emotional labours of many people including social media influencers and content moderators who make the internet seem smart The book provides an invaluable overview of the evidence and debates on the role of digital media in emotional life and guidance for future research policy and action

Contemporary Work and the Future of Employment in Developed Countries Peter Holland, Chris Brewster, 2020-01-23 Whilst only in the second decade of the 21st century we have seen significant and fundamental change in the way we work where we work how we work and the conditions of work The continued advancements of smart technology and artificial intelligence globalisation and deregulation can provide a sleek view of the world of work This paradigm can deliver the opportunity to both control work and provide new challenges in this emerging virtual and global workplace with 24 7 connectivity as the boundaries of the traditional organisation melt away Throughout the developed world the notions of work and employment are becoming increasingly separated and for some this will provide new opportunities in entrepreneurial and self managed work However the alternate or bleak perspectives is a world of work where globalisation and technology work together to eliminate or minimise employment underpinning standardised employment with less and less stable or secure work typified by the rise of the gig economy and creating more extreme work in terms of working hours conditions and rewards These aspects of work are likely to have a significant negative impact on the workforce in these environments These transformations are creating renewed interest in how work and the workforce is organised and managed and its relationship to employment in a period when all predictions are that the pace of change will only accelerate
