Naoum, 2013 Aimed specifically at students on BSc and taught Masters programmes who are embarking on research for the first time this book is clear with explanatory text supported by numerous examples illustrating good practice Writing Built Environment Dissertations and Projects Peter Farrell, 2016-03-28 Writing Built Environment Dissertations and Projects will help you to write a good dissertation or project by giving you a good understanding of what should be included and showing you how to use data collection and analysis tools in the course of your research Addresses prominent weaknesses in under graduate dissertations including weak data collection superficial analysis and poor reliability and validity Includes many more in depth examples making it easy to understand and assimilate the concepts presented Issues around study skills and ethics are embedded throughout the book and the many examples encourage you to consider the concepts of reliability and validity Second edition includes a new chapter on laboratory based research projects Supporting website with sample statistical calculations and additional examples from a wider range of built environment subjects Dissertation Research and Writing for Construction Students Shamil Naoum, 2012-05-23 Dissertation Research and Writing for Construction Students is the only how to guide for BSc and MSc students Covering topic selection research planning and methodology to structuring and writing the dissertation this book includes everything needed for a successful write up A new chapter on Supervision and Assessment as well as updates to references and case studies ensures students know what is expected of them and how they will be assessed The clear concise step by step text illustrated with examples of best case practice makes this an ideal resource for anyone involved in research in this field The Journey to Dissertation Success Elizabeth Laycock, Tim Howarth, Paul Watson, 2016-06-10 Are you about to embark on a research project for the first time Unsure which data collection methods are right for your study Don't know where to start By presenting the reader with a series of key research management questions this book introduces the novice researcher to a range of research designs and data collection methods Building an understanding of these choices and how they can impact on the dissertation itself will lead to a more robust and rigorous dissertation study This book is designed to direct your research choices with informative text and key questions advice from virtual supervisors and reflections from students Lists of suggested further reading also help to support you on your journey to developing an organised and successful dissertation project Researchers seeking support on their journey to a successful dissertation will find this book a valuable resource Whole Life Costing Peter Caplehorn, 2012-11-27 Whole life costing has been a subject waiting to come of age for many years What was previously of mainly academic interest is now becoming a key business tool in the procurement and construction of significant projects With the advent of PPP and in particular of PFI details of the project life need to be assessed and tied in to funding and operation plans Many of these projects run to millions of pounds and are of high political or social importance so the implications of the life of materials is crucial A fundamental requirement

of these procurement routes has been that the whole enterprise should be included within the bid so that a company takes on not only the construction but also the running and maintenance of any building. Additionally, as sustainability has emerged and grown in importance, so has the need for a whole life time costing approach, partly driven by governmental insistence. At the heart of sustainability is an understanding of what the specification means for the future of the building and how it will affect the environment. Whole life costing considers part of this and provides an understanding of how materials may perform and what allowances are needed at the end of their life. This book sets out the practical issues involved in the selection of materials, their performance and the issues that need to be taken into account. The emphasis, unlike in other publications, is not to formularise or to package the issues but to leave the reader with a clear understanding and a sensible practical way of arriving at conclusions in the future.

Decision-making in International Construction Arbitration Haytham

Besaiso, 2023-10-03 This book contributes to the empirical understanding of how arbitrators make their decisions on the substance of commercial disputes arising from international construction projects. It is based on in-depth interviews with 28 international construction arbitrators and on the analysis of dozens of international construction arbitration awards. The combined experience of those who participated in the author's research amounted to hundreds of international construction arbitrations, 300 cases in addition to several hundred international commercial arbitrations. It presents the results of the first and largest research to be undertaken in this area and it will be useful to arbitration practitioners and scholars and to the wider audience of dispute resolution students, practitioners and theorists. In turn, the book examines to what extent international arbitrators apply the law as the substantive norm, providing an explanation for that and then offers insights into whether arbitrators in fact lean towards commercial and transnational norms to construe the parties' contract before discussing to what extent international arbitrators take into account fairness considerations to reach their decisions on the merits of the parties' claims. The book also examines to what extent international arbitrators apply mandatory rules of foreign law. Lastly, it provides insight into the effect of arbitrators' background characteristics on their decisions. Written for arbitration practitioners, arbitrators and legal counsel and scholars, the book will be useful for both experienced arbitrators and those starting their arbitration career or studying for their arbitration qualification. It will also be useful for project professionals involved in contract management and dispute resolution.

Dissertation Research and Writing for Built Environment Students Shamil G. Naoum, 2019-05-14 Dissertation Research and Writing for Built Environment Students is a step by step guide to get students through their final year research project. Trusted and developed over three previous editions, the new fourth edition shows you how to select a dissertation topic, write a proposal, conduct a literature review, select the research approach, gather the data, analyse and present the information and ultimately produce a well-written dissertation. The book simplifies dissertation research and writing into a process involving a sequence of learnable activities and divides the process into three parts. Part One covers the necessary groundwork including identifying the problem, writing

a proposal and reviewing the literature Part Two covers the research design and includes approaches and techniques for data collection and constructing and sampling a questionnaire Part Three covers measurement of data analysis of data with SPSS structuring and writing the whole dissertation and supervision and assessment This new edition is packed with updated examples and research samples making this the ideal resource for students involved in research in built environment subjects such as construction management construction project management facilities management real estate building surveying quantity surveying and civil engineering

Constructing Professional Discourse Concepción Orna-Montesinos, 2012 This book explores the fascinating role that language plays in the construction of non verbal objects by mapping out the ontological meaning of the specialised concepts and the domain specific knowledge embedded in them In doing so it provides a comprehensive linguistic insight into the discourse of professional domain specific communities and hence into the communication practices and procedures of those communities In this respect the book offers a response to the claims made by many of the most influential applied linguists today such as Vijay Bhatia 1993 2004 John Swales 1990 2004 or Ken Hyland 2002 among others who have

consistently defended the need for applied linguistic research into the textual generic and social perspectives on the under researched interrelatedness of the discursual and professional practices of a discipline Specifically this book provides readers with an integrative multi perspective approach to the study of professional domain specific discourses While it mainly draws on the tenets of genre theory and discourse semantics it also nurtures from the theoretical and empirical foundations of applied linguistics cognitive linguistics corpus linguistics and ontological engineering The book starts from the analysis of domain specific texts as final written products with specific lexico grammatical semantic and rhetorical features to later enquire into the written products as textual artefacts closely linked to the social context of production and interpretation of the text This integrative approach provides fresh new insights into the way the processes of writing are affected by the community specific institutional and socio historical circumstances in which domain specific texts are produced
