

Doing Business in the Philippines

The Philippines is the gateway to the vast flourishing markets of the ASEAN nations. Despite their long history dating back to the Spanish colonial period, the island nation is the largest, in terms of land area, in the ASEAN region. It is a country that has been the largest contributor to sustained foreign direct investments in the Philippines. Global investors continue to explore the Philippines for quality manpower and resources, a developing infrastructure for regional growth, a flourishing tourism and retail sector, access to capital & risk.

The Philippine economy withstood the recent global economic downturn better than any other ASEAN country. Apart from being heavily affected by international economic, the Philippines enjoys rampant domestic consumption, low dependence on exports and large amounts of remittances flowing into the country from the millions of Filipinos working abroad. With a stable banking system, a well performing stock market, a consistently expanding tourism and services industry and record high levels of international reserves, the prospects for the Philippine economy remain positive. Furthermore, the Asian Development Bank (ADB), which offers a broad range of business opportunities in the region is located in Manila. These indicators, in combination with a low-key rate of inflation as high as 8.5%, being taught in an online provides many business opportunities for Dutch entrepreneurs. This is particularly true for the sectors mentioned below.

Priority sectors

Transport & Infrastructure

While challenges remain in the area of public infrastructure, the increased public spending on infrastructure has led to less daunting impediments through better roads and more flights.

The next few years will see additional investments from the government and increasing private investments in the Philippine transport sector. The Philippines is also developing other facilities to be an international gateway to being an all-seeing, seaport, with domestic and international routes. Due to the growing dependence on transport and logistics, business opportunities for Dutch companies can be explored for airport and port development, bulk handling and export services facilities for sea-food, commodities and heavy products (e.g. coal storage, shipping, port-related storage facilities).

Commerce

The Netherlands and the Philippines have strong and long-standing bilateral political and economic cooperation in the maritime sector. The Philippines is the "diamond capital of the world" and is the primary source of diamonds for the Dutch market. The country's strategic nature makes it a strategic hub for ports, shipping and maritime regulation within the Asia-Pacific region. Given the substantial economic increase expected for the United shipping sector, more and more Dutch shipping companies are seeking to expand their business presence in the Philippines instead of just partnering with local transport agencies. Similarly, both governments strongly tend the need to continue on Manila-Agaña (MANAA), a high-level bilateral meeting to strengthen maritime cooperation.

Handbook on Water Security Claudia Pahl-Wostl, Anik Bhaduri, Joyeeta Gupta, 2016-01-29 Water security has received increasing attention in the scientific and public policy communities in recent years The Handbook on Water Security is a much needed resource that helps the reader navigate between the differing interpretations of water security It explains the various dimensions of the topic by approaching it both conceptually and thematically as well as in relation to experiences in different regions of the world The international contributors explore the various perspectives on water security to show that it has multiple meanings that cannot easily be reconciled Topics discussed include challenges from human security to consumerism how trade policies can help to achieve water security in a transboundary setting the potential of risk based governance arrangements and the ecology of water security Scholars and postgraduate students in the social sciences working on water related issues will find this book to be of substantial interest It will strongly appeal to policymakers and practitioners looking at the strengths and limitations of water security *Southeast Asian Personalities of Chinese Descent* Leo Suryadinata, 2012 This is a bold project recording the lives of a particular group of Southeast Asians Most of the people whose biographies are included here have settled down in the ten countries that constitute the region Each of them has either self identified as Chinese or is comfortable to be known as someone of Chinese ancestry There are also those who were born in China or elsewhere who came here to work and do business including seeking help from others who have ethnic Chinese connections With the political and economic conditions of the region in a great state of flux for the past two centuries it is impossible to find consistency in the naming process Confucius had stressed that correct names make for the best relationships In this case Professor Leo Suryadinata has been pursuing for decades the elusive goal of finding the right name to give to the large numbers of people who have in one way or another made their homes in or made some difference to Southeast Asia I believe that when he and his colleagues selected the biographies to be included here they have taken a big step towards the rectification of identities for many leading personalities In so doing he has done us all a great service Professor Wang Gungwu National University of Singapore **Trade Associations Directory**, 2007 *The Philippine Lumberman*, 2000 Climate Emergency in the Philippines Kristoffer B. Berse, Juan M. Pulhin, Antonio G. M. La Viña, 2024-05-18 This book provides a snapshot of the manifestations of the climate emergency in the Philippines from a wide array of disciplines including physical sciences social sciences arts and humanities management and law Researchers and faculties at the University of the Philippines contributed to this compilation where each chapter provides policymakers and the public a clear picture of why climate change must be confronted with a sense of urgency and near desperation Divided into three main parts the first one zeroes in on climate vulnerable sectors such as water food and agriculture health and coastal communities in the Philippines to introduce readers to the current pressing impacts of the climate emergency The second part presents case studies of local experiences from the country's three island regions namely Luzon Visayas and

Mindanao and it situates the readers in different environments and contexts The third part features transdisciplinary responses to the climate emergency including salient challenges in relation to planning financing communication and education The concluding chapter highlights eight areas for action to tackle the climate emergency Each chapter comes with an overview and a Summary for Policymakers which provides clear guidance for action to be taken by both local and national policymakers
