Leadership Coaching Skills. Communication, Coaching and Conflict Diane Shawe, 2018-09-06 Self awareness is one hallmark of a good leader To be a good leader you need first to understand yourself to have an understanding of your own leadership style and how it impacts on others One way to discover yourself is to complete a type of self assessment and the second is to ask colleagues for feedback on your leadership abilities This is a very quick read and can be done over breakfast lunch or a coffee break

How Hair Extensions are Sourced, Treated and Graded Diane Shawe, The hair extension bible informs you about what you don t know as a budding hair extension technician consultant or trainer can be harmful to your clients and your business This book is a summary of years of work and research with hair and some of what has been noted throughout that time by other reports and blogs For instance what is the effects of the swelling of Hair Swelling is one of the most damaging conditions of the hair It loses flexibility natural bounce elasticity and strength and is much easier to break how can you avoid this How is hair

treated once it gets to the factory Once the hair arrives at the factory it is treated in a hydrochloric acid bath to remove the cuticle A word of warning hydrochloric acid is extremely hazardous Please do not put yourself at risk by experimenting with this chemical But back to the problem It s not the remy hair remy hair is relatively easy to process and the damage inflicted during de cuticalization is slight Non remy hair is the villain A little book full of facts and advice that will keep you informed and up to date with the hair extension products *Brandweek* ,2010-10 Is Adult Education Broken Diane Shawe, Is Adult Education Broken DianeShaweAuthor explores the main failings in education for an economy powered by technology fueled by information driven by knowledge and becoming automated affecting the poor As Isaac Asimov a master of science fiction literature once said No sensible decision can be made any longer without taking into account not only the world as it is but the world as it will be What has happened Why have these large institutions priced education out of some fundamental principles How can we make the new economic age enhance rather than diminish our quality of learning How can we make this amazing innovation advance the prospects of all people especially those with experience and not just for the youth It is clear that at this moment most educational systems are not keeping pace with changing technology and the ever evolving world of work Not enough people are thinking strategically enough in this area Fundamentally we need to change what people learn how people learn when people learn and even why people learn We must get beyond the traditional model of students sitting passively in classrooms following instructions and memorising material that they are tested and scored on which sometimes turn out to be of little use in an every changing economy It is evident that computers can do that for us There has always been a great deal of lip service given to the idea of learning by doing but not much has been done about it In fact John Dewey remarked in 1916 in his book *Democracy and Education* Why is it that in spite of the fact that teaching by pouring in learning by passive absorption are universally condemned that they are still so entrenched in practice That education is not an affair of telling and being told but an active constructive process is a principle almost as generally violated in practice as conceded in theory Transformative learning in time of crisis when Individuals face Collective Challenges Diane Shawe M Ed I think it is imperative that this century focuses on Adult Transformation Learning by providing Training On Demand During the last twenty years the use of the word crisis seems to have increased around the world Referring to sudden and intensely political economic social psychological cultural or environmental changes this term emerges now more frequently in everyday vocabulary According to transformative learning theory the emergence of a crisis represents a potential opportunity for personal and or collective transformation grounded in the capacity of individuals and groups to revisit the perspectives through which they interpret their own experience Considering recent history how does the emergence of social economic political cultural intellectual or environmental crisis manifest an opportunity or an expression of transformative learning How does the experience of individual or collective crisis affect the way one learns to critically interpret one s own experiences an interesting observation indeed *Mediaweek* ,2010-10 *Contemporary Business*
