Proven Youtube Shorts Ideas Ideas In The United States:

The New Islamic State Jack Covarrubias, Tom Lansford, 2016-09-17 The rise of the Islamic State has dramatically forced a recalculation of political order and security in the Persian Gulf and broader Greater Middle East by the United States and its allies and adversaries including most notably Iran Israel and Saudi Arabia Since the Arab Spring of 2011 the Islamic State has altered the military balance in the Syrian intra state conflict and captured significant territory in Iraq Its military successes has attracted foreign fighters from more than 100 countries drawn in some cases by a sophisticated recruitment strategy that effectively combines a jihadist message with a social media outreach program targeting vulnerable Muslim populations in the region and the West The Islamic State has prompted renewed American and allied military intervention in Iraq and Syria and complicated the US relationship with its Iranian adversaries The New Islamic State examines the rise of the religious extremist organization from the ashes of al Qaeda in Iraq to its current efforts in Syria and Iraq and is designed to provide a comprehensive overview of the Islamic State its effects on the Persian Gulf and Greater Middle East and the response of both regional and great powers The book is suitable for academics policymakers and the general public

What We Need to Face in American Education Gary Kroesch, Bill Madigan, 2011-03-23 For the first time in human history we are living in an age where the youth of our nation know more about societys cutting edge tools than the adults charged with passing societys technical and cultural knowledge on to them Most of our young people have far more facility with computer and telecommunications technology than our teaching corps and generally that gap only widens as students travel from elementary school all the way to university and beyond Its a brave new and often dangerous world that todays youth must learn to navigate Now more than ever they need educators to step up and teach them how to be critical thinkers able to discriminate between the true and the merely seductive to see beyond the glossy veneer on harmful websites harmful ideas and sadly harmful people in both the real and cyber worlds We need to spend a little less time teaching students how to take standardized tests and a lot more time developing their critical faculties so they will be able to solve lifes problems profit from challenging situations and understand the increasingly complex world they must ken at an earlier and earlier age

What a Life! a Different Kind of Biography Nelson Herbert LaFountain, 2020-11-15 Herein are printed stories and poems I have written over the years in my own way of telling my story Rather than an autobiography I thought this may be a better way of presenting one s life rather than in one mundane book I began with a book and then I found I like to present my life this way These are truthful works and not fiction Some had memory holes that needed filling who said what or who I gave credit to but nothing that would take away from the story Its just the way I tell my life After all my life has been a series of short stories and poems not one continuous biography or even one long story I tried to keep them truthful at all times My poetry is not the deep thinking style but happenings in poetry form I hope you enjoy it The Chapter numbers are assigned to the places I lived when the stories happened not necessarily in the order that they happened You will find the stories and

poems are not numbered I began writing short stories and poems before I started my book Then after a few stories I figured it would be a good way to write a book So this is it for good or ill and I am not an author with an extensive vocabulary by any stretch of the imagination I hope you ll forgive that They so I m told are quite interesting and easy reading Take them like vitamins one or two a day I hope you will laugh and cry and enjoy The stories poems musings and thoughts in this book are the product of but not limited to a lifetime of memories love life pain and laughter It is a labor of love in an effort to sing the praises of those that deserve it the most and not for the writer For it was the people that this work was dedicated to that I have to thank for almost all the memories If it weren t for the people there would be absolutely no need for writing this book

Myths and Realities of Cyber Warfare Nicholas Michael Sambaluk,2020-03-01 This illuminating book examines and refines the commonplace wisdom about cyber conflict its effects character and implications for national and individual security in the 21st century Cyber warfare evokes different images to different people This book deals with the technological aspects denoted by cyber and also with the information operations connected to social media s role in digital struggle The author discusses numerous mythologies about cyber warfare including its presumptively instantaneous speed that it makes distance and location irrelevant and that victims of cyber attacks deserve blame for not defending adequately against attacks The author outlines why several widespread beliefs about cyber weapons need modification and suggests more nuanced and contextualized conclusions about how cyber domain hostility impacts conflict in the modern world After distinguishing between the nature of warfare and the character of wars chapters will probe the widespread assumptions about cyber weapons themselves The second half of the book explores the role of social media and the consequences of the digital realm being a battlespace in 21st century conflicts The book also considers how trends in computing and cyber conflict impact security affairs as well as the practicality of people s relationships with institutions and trends ranging from democracy to the Internet of Things *World Politics Simulations in a Global Information Age* Hemda Ben-Yehuda,Luba
