The Ultimate Modern Guide to Artificial Intelligence Enamul Haque, 2020-07-21 The era of artificial intelligence has arrived You who only felt far from artificial intelligence and the growing dream trees are now inseparable from artificial intelligence What does AI have to do with me Isn't it a distant future that has nothing to do with me not a scientist a technician or a computer programmer Well Artificial intelligence is not a story of someone who has nothing to do with it but the fact is it is now everyone's story AI is already deeply infiltrating everyone's life The question is no longer whether we use technology or not it's about working together in a better way Surrounding technologies like Siri Alexa or Cortana are seamlessly integrated into our interactions We walk into the room turn on the lights play songs change the room temperature keep track of shopping lists book a ride at the airport or remind ourselves to take the proper medication on time It is now necessary to look at artificial intelligence from a broader and larger perspective You should not just hang on to complex deep learning algorithms and think only through science and technology but through the eyes of emotions and humanities These days elementary school students learn English and coding at school Tomorrow's elementary school students will learn AI Of course not everyone needs to be an AI expert But if you don't understand AI you will be left out of the trend of changing times AI comes before English and coding This is because artificial intelligence is the language and tool of the future This book opens your door to the most critical understanding needed of AI and other relevant disruptive technologies Artificial intelligence will significantly change societal structures and the operations of companies The next generation of employees needs to be trained as a workforce before entering the job market and the existing workforce is regularly recharged and skilled There is plenty on this for reskilling too This is the most definitive compendium of AI The Internet of Things Machine Learning Deep Learning Data Science Big Data Cloud Computing Neural networks Robotics the future of work and the future of intelligent industries
