**Microwave Remote Sensing** Fawwaz T. Ulaby,1981      Active and Passive Microwave Remote Sensing of Higher Latitude Precipitation Mark S. Kulie,2010      Microwave Radiometry and Remote Sensing Applications P. Pampaloni,1989-12 This book contains papers by well renowned scientists from all over world including Eastern Europe which were presented during a specialist meeting on microwave radiometry and its applications to remote sensing of the atmosphere and the surface of the earth held in Florence Italy in March 1988 The book is divided into five sections some of which contain review papers which summarize the most recent advances in the field The sections are Microwave radiometry of the earth s surface Dielectric properties of natural materials Microwave radiometry of the atmosphere Synergism of passive and active microwave remote sensors Technology of passive microwave systems      Active and Passive Microwave Remote Sensing of Large Scale Surface Characteristics Jochen Grandell,2000      Active and Passive Microwave Remote Sensing for Environmental Monitoring II ,2018      Active and Passive Microwave Remote Sensing of Soil Moisture Rajat Bindlish,2000      **Microwave Remote Sensing: Radar remote sensing and surface scattering and emission theory** Fawwaz Tayssir Ulaby,Richard K. Moore,Adrian K. Fung,1981      **Sea Surface Temperature Estimation Using Active and Passive Microwave Remote Sensing** Nai-Yu Wang,1998      Introduction to Microwave Remote Sensing Iain H. Woodhouse,2017-07-12 Introduction to Microwave Remote Sensing offers an extensive overview of this versatile and extremely precise technology for technically oriented undergraduates and graduate students This textbook emphasizes an important shift in conceptualization and directs it toward students with prior knowledge of optical remote sensing the author dispels any linkage between microwave and optical remote sensing Instead he constructs the concept of microwave remote sensing by comparing it to the process of audio perception explaining the workings of the ear as a metaphor for microwave instrumentation This volume takes an application driven approach Instead of describing the technology and then its uses this textbook justifies the need for measurement then explains how microwave technology addresses this need Following a brief summary of the field and a history of the use of microwaves the book explores the physical properties of microwaves and the polarimetric properties of electromagnetic waves It examines the interaction of microwaves with matter analyzes passive atmospheric and passive surface measurements and describes the operation of altimeters and scatterometers The textbook concludes by explaining how high resolution images are created using radars and how techniques of interferometry can be applied to both passive and active sensors      **Microwave Indices from Active and Passive Sensors for Remote Sensing Applications** Emanuele Santi,Simonetta Paloscia,2019-10-21 Past research has comprehensively assessed the capabilities of satellite sensors operating at microwave frequencies both active SAR scatterometers and passive radiometers for the remote sensing of Earth s surface Besides brightness temperature and backscattering coefficient microwave indices defined as a combination of data collected at different frequencies and polarizations revealed a good sensitivity to hydrological cycle

parameters such as surface soil moisture vegetation water content and snow depth and its water equivalent The differences between microwave backscattering and emission at more frequencies and polarizations have been well established in relation to these parameters enabling operational retrieval algorithms based on microwave indices to be developed This Special Issue aims at providing an overview of microwave signal capabilities in estimating the main land parameters of the hydrological cycle e g soil moisture vegetation water content and snow water equivalent on both local and global scales with a particular focus on the applications of microwave indices

**Microwave Remote Sensing: From theory to applications** Fawwaz Tayssir Ulaby,1981 Active and Passive Microwave Remote Sensing for Environmental Monitoring ,2018 *Encyclopedia of Soil Science* Rattan Lal,2006 Upholding the high standard of quality set by the previous edition this two volume second edition offers a vast array of recent peer reviewed articles It showcases research and practices with added sections on ISTIC World Soil Information root growth and agricultural management nitrate leaching management podzols paramos soils water repellent soils rare earth elements and more With hundreds of entries covering tillage irrigation erosion control ground water and soil degradation the book offers quick access to all branches of soil science from mineralogy and physics to soil management restoration and global warming Publisher s website Statistical analysis and combination of active and passive microwave remote sensing methods for soil moisture retrieval Kathrina Rötzer,2016 Microwave Remote Sensing Fawwaz T. Ulaby,Adrian K. Fung,Richard K. Moore,Artech House,1986 **Active and Passive Microwave Remote Sensing for Environmental Monitoring III** Fabio Bovenga,2019 **Application of Passive and Active Microwave Remote Sensing for Snow Water Equivalent Estimation** Jinmei Pan,2017 Snow accumulation on the ground changes the energy balance between the land and the atmosphere and stores winter precipitation for water supplies in many parts of the world In practice the snow water equivalent SWE defined as the equivalent depth of liquid water when snow completely melts is difficult to map in cold regions except via remote sensing techniques The microwave remote sensing MWRS has been used for SWE estimation since the 1980s based on the interactions of microwave radiation with snow crystals In this study physically based radiative transfer RT models and the Bayesian based Markov Chain Monte Carlo MCMC approach were applied to develop a high accuracy SWE retrieval algorithm The models and the algorithms were tested using ground based snowpit and microwave measurements Two widely used snow RT models were fully compared in the aspects of snow micro structure assumptions volume scattering theories and the RT equation resolution The Microwave Emission Model of Layered Snowpacks MEMLS based on the Improved Born Approximation IBA was shown to be an adequate observation model to estimate SWE using the multi frequency brightness temperature TB at 10 65 to 90 GHz The prior information is from a set of globally available datasets and the performance is tested for local prior information derived from historical ground measurements The retrieval algorithm was later adapted for active microwave SWE retrieval using the backscattering coefficient at 10 2 to 16 7 GHz Results showed that MEMLS IBA can simulate the measured microwave signals with a 10 K

accuracy for TB and a 1 dB accuracy for the backscattering coefficient The passive microwave retrieval algorithm achieved an accuracy of 30 mm for shallow snow with two layer snow properties estimated However the active microwave retrieval algorithm reproduced similar accuracy only in the synthetic experiment using 1 layer snow property estimates Future improvement requires a better active microwave observation model
