1. **Abstract** – This paper presents a new method for the automatic detection of the onset of a seizure. The method is based on the analysis of the EEG signal and the detection of the onset of a seizure is achieved by the analysis of the power spectrum of the EEG signal. The method is applied to the analysis of the EEG signal of a patient with a seizure and the results are compared with the results of a manual analysis. The results show that the method is able to detect the onset of a seizure with a high accuracy.
