Williamson McDiarmid, Yong Zhao, 2022-01-31 Learning for Uncertainty explores technology's role in education specifically unpacking the question How should educators prepare today's children for a world that has yet to be made As technology evolves faster than our capacity to fully understand the social cultural economic and moral implications

of many innovations today's educators are tasked with the unique role of preparing students to capitalize on technology's opportunities and also mitigate its dangers to their society to democratic processes and to institutions. Veteran educators McDiarmid and Zhao explore the implications of emerging technologies for future jobs, organizations, students, and learning, covering topics such as The future of work and workers as technology eliminates some industries while creating new ones. Potential futures both bright and dark await students. The qualities, dispositions, social behaviors, and skills that are likely to advantage students in the future. The possibility of technology to revolutionize education in ways that will better position students for an uncertain future. How technology can free teachers from time and effort devoted to routine matters to instead assuming roles that are potentially more satisfying and supportive of their students' learning. Learning opportunities and educator roles that have the potential to bring about needed changes. Capitalizing on these uncertain times to rethink curriculum, pedagogy, opportunities to learn, and the organization of school, as well as the roles of students, educators, parents, and policymakers. This latest book in the Routledge Leading Change series is ideal reading for educators and policymakers in both P-12 and higher education interested in ensuring our education systems provide the experiences and learning opportunities necessary to cultivate the innovative, iconoclastic, and generative thinkers and creators needed for a future that nourishes the minds, bodies, and spirits of all.
