Maple Grove Daniel Scherschel, 2006-11 This book was written while living in the Maple Grove neighborhood It is about the people and work in the Maple Grove area north of Bloomington and some of the events on my dad's farm Dad called it the Showers Hedgerow Farm because the farm was owned by the Showers furniture company and the many rows of large hedge trees Osage Orange The chapters Blanche and James are of my parents and some family history They are also about the time our family moved from Lawrence County Indiana to our farm in the Maple Grove area The farm was once owned by the Showers family who cropped and sold hardwood from this and surrounding farms The neighbor women cooked in the summer home and the men worked in the fields and the woods before going home to their own farms The Showers Company also had a factory in Bloomington which sold furniture world wide starting about 1869 *Solving Problems in Scientific Computing Using Maple and MATLAB®* Walter Gander, Jiri Hrebicek, 2012-12-06 From the reviews An excellent reference on undergraduate mathematical computing American Mathematical Monthly manuals for such systems Maple and MATLAB tend to use trivial examples making it difficult for new users of such systems to quickly apply their power to real problems The authors have written a good book to address this need the book is worth buying if you want guidance in applying Maple and MATLAB to problems in the workplace Computing Reviews The presentation is unique and extremely interesting I was thrilled to read this text and to learn the powerful problem solving skills presented by these authors I recommend the text highly as a learning experience not only to engineering students but also to anyone interested in computation Mathematics of Computation *Introduction to Maple* Andre HECK, 2012-12-06 In symbolic computation on computers also known as computer algebra keyboard and display replace the traditional pencil and paper in doing mathematical computations Interactive computer programs which are called computer algebra systems allow their users to compute not only with numbers but also with symbols formulae equations and so on Many mathematical computations such as differentiation integration and series expansion of functions and inversion of matrices with symbolic entries can be carried out quickly with emphasis on exactness of results and without much human effort Computer algebra systems are powerful tools for mathematicians physicists chemists engineers technicians psychologists sociologists in short for anybody who needs to do mathematical computations Computer algebra systems are indispensable in modern pure and applied scientific research and education This book is a gentle introduction to one of the modern computer algebra systems viz Maple Primary emphasis is on learning what can be done with Maple and how it can be used to solve applied mathematical problems To this end the book contains many examples and exercises both elementary and more sophisticated They stimulate you to use Maple and encourage you to find your way through the system An advice read this book in conjunction with the Maple system try the examples make variations of them and try to solve the exercises Maple for Basic Calculus Richard Parker, 1996-12 Learn calculus from the new vantage point of a PC based interactive computer algebra system This book shows how Maple V
