This paper investigates the empirical studies examining the relationship between Accounting Information Systems (AIS) alignment and performance in Small and Medium Enterprises (SMEs). Hussin *et al.*, (2002) found that there is a relationship among owner commitment, information technology (IT) sophistication, external IT expertise, and information systems (IS) alignment, while Ismail and King (2006) found that information systems alignment has a significant impact on firm performance. This paper discusses previous researches that explain SMEs performance and the factors influencing performance of SMEs.

Previous studies have attempted to explain the relationship between AIS and SMEs performance (Boulianne, 2007; Francalanci and Morabito,

2008). Hussin *et al.*, (2002) and, Ismail and King (2007) explain determinant of information systems implementation such as IT sophistication, owner commitment, and IT strategy on AIS alignment in SMEs. The studies on technological implementation in SMEs are more interesting than those in large firms. Although research on IT and performance has been conducted in large firms, it is important for small firms, since the implementation of technology will improve small firm performance (Grande *et al.*, 2010). Both small firms and large firms have implemented AIS (Ismail and King, 2006). However, the development of IT in large firms cannot be equally applied to small firms (Thong, 1999).

The writer included a list of previous researches investigating AIS and performance in the Appendix-I of this paper. Some researchers have attempted to associate AIS with
