Identity in Adolescence 4e Laura Ferrer-Wreder, Jane Kroger, 2019-07-05 This fully revised fourth edition of *Identity in Adolescence The Balance Between Self and Other* presents four theoretical perspectives on identity development during adolescence and young adulthood and their practical implications for intervention Ferrer Wreder and Kroger consider adolescent identity development as the unique intersection of social and cultural forces in combination with individual factors that each theoretical model stresses in attempting to understand the identity formation process for contemporary adolescents *Identity in Adolescence* addresses the complex question of how adolescent identity forms and develops during adolescence and young adulthood and serves as the foundation for entering adult life The book is unique in its presentation of four selected models that address this process along with cutting edge research and the implications that each of these models hold for practical interventions This new edition has been comprehensively revised with five completely new chapters and three that have been extensively updated New special topics are also addressed including ethnic sexual and gender identity development the role of technology in adolescent identity development and ongoing identity development beyond adolescence The book is essential reading for advanced undergraduate and graduate students studying adolescent development self and social identity within developmental psychology social psychology and clinical psychology as well as practitioners in the fields of child welfare and mental health services social work youth and community work and counselling

Identity in Adolescence Jane Kroger, 2004 Fully updated to include the most recent research and theoretical developments in the field the third edition of *Identity in Adolescence* examines the two way interaction of individual and social context in the process of identity formation Setting the developmental tradition in context Jane Kroger begins by providing a brief overview of the theoretical approaches to adolescent identity formation currently in use This is followed by a discussion of five developmental models which reflect a range of attempts from the oldest to among the most recent efforts to describe this process and include the work of Erik Erikson Peter Blos Lawrence Kohlberg Jane Loevinger and Robert

Kegan Although focussing on each theorist in turn this volume also goes on to compare and integrate the varied theoretical models and research findings and sets out some of the practical implications for social response to adolescents Different social and cultural conditions and their effect on the identity formation process are also covered as are contemporary contextual narrative and postmodern approaches to understanding and researching identity issues The book is ideal reading for students of adolescence identity and developmental psychology

Interventions for Adolescent Identity

Development Sally L. Archer,1994-02-04 Do adolescents have a critical period of identity development How much identity activity is needed in each of the life domains such as career family and ideology for healthy adolescent development An interdisciplinary team of scholars and practitioners addresses these and related questions to examine what we know about adolescent identity formation and how this information can be effectively used to intervene with adolescents to provide them with better guidance about their life choices

Understanding Early Adolescent Self and Identity Thomas M.

Brinthaup, Richard P. Lipka,2002-02-22 Addresses adolescent identity issues and suggests practical approaches to facilitate development and adjustment

Identity Development Jane Kroger,2000 This coherent account of the development of identity considers the issue as a life long process not restricted to adolescence It integrates biological social and cultural theoretical perspectives with case study material

Coping and Self-Concept in Adolescence H.A. Bosma,A.E. (Sandy)

Jackson,2011-12-21 Self concept and coping behaviour are important aspects of development in adolescence Despite their developmental significance however the two areas have rarely been considered in relation to each other This book is the first in which the two areas are brought together it suggests that this interaction can open the way to new possibilities for further research and to new implications for applied work with adolescents Two separate chapters review research carried out in each of the areas These are followed by a series of more empirically focussed chapters in which issues such as changes in relationship patterns difficult school situations leaving school use of leisure anxiety and suicidal behaviour are examined in the context of self concept and coping The final chapter seeks to identify some of the central themes emerging from this work and discusses possible research and applied implications
