**AGRIVALUE 360°: ENABLING SMART, INCLUSIVE AND GREEN SUPPLY CHAINS** Dr. Sonali Panda, Dr. Satish Kumar Panigrahi, Dr. Vishwas Deep, Dr. Raveena, Dr. Vikas Kumar, 2025-07-31 AgriValue 360: Enabling Smart Inclusive and Green Supply Chains is a comprehensive and forward thinking edited volume that explores the transformation of agri food systems in the 21st century. This book serves as a critical resource for academics, researchers, policymakers, entrepreneurs, and students interested in the nexus of agriculture, technology, sustainability, and inclusive development. With a multidimensional approach, the book emphasizes the importance of creating value across the entire agri supply chain, from farm to fork, through the integration of smart technologies, inclusive strategies, and green practices. The chapters in this edited volume are contributed by experts from diverse disciplines, offering rich insights into emerging trends such as precision agriculture, blockchain for traceability, circular bioeconomy, sustainable input systems, climate resilient farming, and digital platforms for market linkage. The book also investigates the role of women, youth, and marginalized communities in agri value chains, advocating for equitable participation and shared prosperity. The contributors argue that enhancing inclusiveness in agri business models is key to sustainable rural livelihoods and food security. Case studies from different regions underscore practical innovations, successful startups, and scalable interventions that have redefined agri enterprise models. The book addresses contemporary challenges like supply chain disruptions, post harvest losses, carbon emissions, and environmental degradation, proposing actionable strategies for their mitigation. It highlights the convergence of policy, science, and entrepreneurship in creating resilient food systems. AgriValue 360 underscores that the future of agriculture is digital, collaborative, and environmentally conscious. The volume advocates for

strong institutional frameworks data driven decision making and stakeholder partnerships to realize the vision of smart inclusive and green agri value chains Ultimately this book is a timely contribution to the global discourse on sustainable agriculture and rural transformation in the face of climate change and global uncertainties Handbook of Research on Teaching With Virtual Environments and AI Panconesi, Gianni, Guida, Maria, 2021-02-19 The increasingly pervasive use of digital technology has catapulted society into an interconnected world where the natural boundaries between humankind and machine virtual and real individual and community have become less perceptible As individuals interact with different digital technologies they must build a digital intelligence which must be further cultivated as it is a key competency for the future of school and work Digital intelligence includes understanding the mutual strengths between people and technology as well as developing an awareness in the use of digital tools in order to avoid common threats such as cyberbullying addiction to video games techno stress and more As adolescents continue to engage with virtual reality and 3D virtual worlds where the online and offline overlap and coincide it is important to build this intelligence as well as utilize these technologies to promote successful learning The Handbook of Research on Teaching With Virtual Environments and AI explores the new personalized educational opportunities that are available with digital technology and virtual environments that can be used within education This book focuses on the use of these tools and how to navigate the use of new technologies such as AI and virtual environments for educational practices While highlighting topics such as virtual worlds game based learning intelligent tutoring augmented reality and more this book is ideal for teachers administrators technologists educational software developers IT specialists practitioners researchers academicians and students interested in how virtual environments and AI are being implemented in teaching practices **The New Empire of AI** Rachel Adams, 2024-11-05 As AI takes hold across the planet and wealthy nations seek to position themselves as global leaders of this new technology the gap is widening between those who benefit from it and those who are subjugated by it As Rachel Adams shows in this hard hitting book growing inequality is the single biggest threat to the transformative potential of AI Not only is AI built on an unequal global system of power it stands poised to entrench existing inequities further consolidating a new age of empire AI's impact on inequality will not be experienced in poorer countries only it will be felt everywhere The effects will be seen in an intensification of international migration as opportunities increasingly concentrate in the hands of wealthier nations in heightened political instability and populist politics and in climate related disasters caused by an industry that is blind to its environmental impact across supply chains We need to act now to address these issues Only if the current inequitable trajectory of AI is halted the incentives changed and the production and use of AI decentralized and decoupled from wealthier nations will AI be able to deliver on its promise to build a better world for all Also available as an audiobook
