web uniform circular motion is the motion of a body traveling at a constant speed along a circular path the speed remains constant but the velocity varies if a particle is traveling in a circle it must be experiencing some acceleration towards the center causing it to rotate around the center

*6 2 uniform circular motion physics openstax* - Mar 10 2023

web the simplest case of circular motion is uniform circular motion where an object travels a circular path at a constant speed note that unlike speed the linear velocity of an object in circular motion is constantly changing because it is always changing direction
