Artificial Intelligence for Learning Donald Clark, 2020-08-13 Artificial intelligence is creating huge opportunities for workplace learning and employee development. However, it can be difficult for L & D professionals to assess what difference AI can make in their organization and where it is best implemented. *Artificial Intelligence for Learning* is the practical guide L & D practitioners need to understand what AI is and how to use it to improve all aspects of learning in the workplace. It includes specific guidance on how AI can provide content curation and personalization to improve learner engagement, how it can be implemented to improve the efficiency of evaluation, assessment and reporting, and how chatbots can provide learner support to a global workforce. *Artificial Intelligence for Learning* debunks the myths and cuts through the hype around AI, allowing L & D practitioners to feel confident in their ability to critically assess where artificial intelligence can make a measurable difference and where it is worth investing in. There is also critical discussion of how AI is an aid to learning and development, not a replacement, as well as how it can be used to boost the effectiveness of workplace learning, reduce drop-off rates in online learning, and improve ROI. With real-world examples from companies who have effectively implemented AI and seen the benefits, as well as case studies from organizations including Netflix, British Airways, and the NHS, this book is essential reading for all L & D practitioners needing to understand AI and what it means in practice. [The Digital and AI Coaches'](#)

[Handbook](#) Jonathan Passmore, Sandra J. Diller, Sam Isaacson, Maximilian Brantl, 2024-06-28 This comprehensive practitioner guide supports coaches in developing their understanding of digital technologies and how to work in ever-changing digital environments and shows coaches how to craft their own practices to take advantage of working online. The practice of coaching is undergoing significant change with technology widely embedded and used in professional coaching services today. Coaching practitioners worldwide are adapting to digital environments, and a host of new technological tools have come into play, from the developments in virtual reality to AI-informed coaching and from coaching bots to workplace apps. Edited by Jonathan Passmore, Sandra J. Diller, Sam Isaacson, and Maximilian Brantl, this third book in the acclaimed *Coaches Handbook Series* brings together internationally respected coaching experts and practitioners to share the most up-to-date know-how. The book takes you through key technical developments, the critical factors in making digital coaching successful, and how to build a coaching business using these technologies. The book also considers the impacts on the wider industry and concludes with a number of case studies of global coaching organisations and their experiences of using digital techniques, including CoachHub and EZRA. Aimed at coach practitioners, their supervisors, trainers, and student coaches on accreditation programmes or undertaking training for a certificate in coaching, this book showcases best practice, new ideas, and the science behind the digital revolution within coaching practice and the coaching industry. **Artificial Intelligence for**
