Technology has immense potential to advance medical and health education and medical practice and to greatly improve the experiences of learners and service receivers However many medical and health educators currently do not have the requisite skills exposure and capacity to use the advanced and relatively sophisticated technologies currently available to add value to student and trainee experiences This book addresses this current skills gap providing a comprehensive yet readable introduction to and summary of this rapidly developing field helping medical and health educators to make the most of the technology available to enhance and improve the student learning experience while adhering to principles that are in alignment with accepted medical education practices where standardization remains a key consideration Key Features Fills gaps in previous training to equip medical and health educators with requisite knowledge skills and attitude to embrace technological advancements Considers tech integration into each major division of health and medical education Provides strategies for leading innovation in health and medical education Addresses educational management and leadership aspects with an emphasis on standardization and optimization in educational technologies This new book provides a much needed standard text on the effective use of technology for all educators involved in teaching medical students and other health professions globally **Ethical Design of Artificial Intelligence-based Systems for Decision Making** Valentina

Franzoni,Jordi Vallverdu,Roberto Capobianco,Giulio Biondi,Alfredo Milani,Francesca Alessandra Lisi,Stefano Cagnoni,2023-11-29 Artificial Intelligence AI including Machine Learning with Deep Neural Networks is making and supporting decisions in ways that increasingly affect humans in many aspects of their lives Both autonomous and decision support systems applying AI algorithms and data driven models are used for decisions about justice education physical and psychological health and to provide or deny access to credit healthcare and other essential resources in all aspects of daily life in increasingly ubiquitous and sometimes ambiguous ways Too often these systems are built without considering the human factors associated with their use and the need for clarity about the correct way to use them and possible biases

Models and systems provide results that are difficult to interpret and are accused of being good or bad whereas good or bad is only the design of such tools and the necessary training for them to be properly integrated into human values
