Innovation in the Public Sector Fatih Demir, 2022-09-17. The book discusses smart governments and innovation in the public sector. In hopes of arriving at a clear definition of innovation in the field of public administration, the volume provides a wide survey of global policies and practices, especially those aimed at reducing bureaucracy and using information communication technologies in public service delivery. Chapters look at current applications across countries and multiple levels of government, from public innovation labs in the UK to AI in South Korea. Providing concrete examples of innovation culture at work in public institutions, this volume will be of use to researchers and students studying new public management, public service delivery and innovation, as well as practitioners and professionals working in various public agencies.

AI-Powered Scholar Bron Eager, 2024-12-27. This book is a practical and comprehensive guide on using AI tools to streamline and optimise the academic writing and research process. Through a series of step by step instructions and practical tips, this book provides readers with the knowledge and tools they need to leverage the power of AI to produce high quality academic publications. The text covers the historical context of AI development, techniques for communicating with AI systems and strategies for transforming AI into helpful research assistants. Readers will discover the art of prompt engineering and learn practical applications for using AI to ideate research projects, conduct literature searches and accelerate academic writing. Emphasis is placed on the responsible use of AI, positioning it as an extension of human capabilities rather than a replacement. Through real world examples, complex AI concepts are demystified and key challenges and limitations are addressed head on. Whether you're a university student or a tenured professor, this book is your indispensable companion to beginning your path towards becoming an AI powered scholar.

AI-Driven Sustainability Joanna Rosak-Szyrocka, Radosław Wolniak, 2025-11-25. AI Driven Sustainability: The Future of Human Resources Management is an interdisciplinary publication that demonstrates the artificial intelligence phenomenon or AI in the sustainable shaping of human resources management. The role of AI as a support to the existing HR processes and a comprehensive changer of organizational ethical, social and environmental values is reviewed by authors. By providing readers with the wide scale of explanatory case studies among global business corporations and with a thorough review of law, ethical and technological issues in 10 chapters, the book suggests a green model of AI implementation in HR dimensions. A must read publication for researchers, practitioners and leaders who want to make their business part of the conscious future in labor in the environment of digitalization.
