Academic researchers want their research to be understood and used by non technical audiences but that requires communication that is more accessible in the form of non technical and shorter summaries The researcher must both signal the quality of the research and ensure that the content is salient by making it more readable AI tools can improve salience however they can also lead to ambiguity in the signal since true effort is then difficult to observe We implement an online factorial experiment providing non technical audiences with a blog on an academic paper and vary the actual author of the blog from the same paper human or ChatGPT and whether respondents are told the blog is written by a human or AI tool Even though AI generated blogs are objectively of higher quality they are rated lower but not if the author is disclosed as AI indicating that signaling is important and can be distorted by AI Use of the blog does not vary by experimental arm The findings suggest that provided disclosure statements are included researchers can potentially use AI to reduce effort costs without compromising signaling or salience Academic researchers want their research to be understood and used by non technical audiences but that requires communication that is more accessible in the form of non technical and shorter summaries The researcher must both signal the quality of the research and ensure that the content is salient by making it more readable AI tools can improve salience however they can also lead to ambiguity in the signal since true effort is then difficult to observe We implement an online factorial experiment providing non technical audiences with a blog on an academic paper and vary the actual author of the blog from the same paper human or ChatGPT and whether respondents are told the blog is written by a human or AI tool Even though AI generated blogs are objectively of higher quality they are rated lower but not if the author is disclosed as AI indicating that signaling is important and can be distorted by AI Use of the blog does not vary by experimental arm The findings suggest that provided disclosure statements are included researchers can potentially use AI to reduce effort costs without compromising signaling or salience
