A Systems Approach to Small Group Interaction Stewart L. Tubbs, 2005-11 The only book that integrates all important small group topics into a single comprehensive conceptual model this text pioneered the systems approach for the group communication course Each chapter begins with a brief preview followed by a glossary of terms and a real life case study the chapter text material is followed by several experiential exercises for skill development and two original readings The new edition has been extensively updated and revised with new information on virtual teams and streamlined exercises at the end of each chapter

Virtual Technologies Jerzy Kisielnicki, 2008 This publication presents incompassing research of the concepts and realities involved in the field of virtual communities and technologies Provided by publisher

Effective Group Discussion Gloria J. Galanes, John K. Brillhart, 2004 Written for the small group communication course Effective Group Discussion combines the most recent research findings relevant to understanding small groups with the practical tools students need to become productive group members This text s implementation of research and theory in the systems a

Creating a Better World Anna Clarke, 2009

Educational Perspectives , 2002

Handbook of Online Learning Kjell Erik Rudestam, Judith Schoenholtz-Read, 2002-02-19 I found the book excellent and read every one of the 450 pages Many of the chapters reflect the Fielding Institute s focus on human and organizational behaviour educational leadership and organizational management The book will be particularly appropriate for readers from a corporate training or business school background though there is much for academics and online educators at all levels and subject areas to learn from this well crafted book There are many books and articles about online learning This is one of the better ones Robin Mason Computers and Education Technology mediated instruction has taken the university and the corporate sector by storm As more instructors teach online for a dispersed learning community in both academic and business environments there s a need for resources that will help them adapt to this new teaching method Educators who come out of traditional academic institutions tend to use traditional

methods when offering courses online e g lectures textbooks and readings examinations rather than attend to small group processes and principles of what the editors of this volume call andragogy This Handbook goes beyond the mechanics of how to create and direct an online learning experience to consider such a new approach to pedagogy in doing so The editors primary purpose is to clarify the conceptual issues that underlie effective online teaching and to offer practical guidance to educators and corporate trainers who plan to teach in a virtual environment Their central tenet is the adoption of computer networks as the teaching vehicle of the future demands a re examination of our core beliefs about pedagogy and how students learn The transfer of a classroom curriculum into cyberspace is deceptively simple but doing so without an appreciation of the nuances and implications of learning online ignores not only the potential of this medium but the inevitable realities of entering it Rather than fear the challenges that new technology brings to systems of learning the editors hope to help instructors embrace it by re thinking how knowledge is acquired and how educational processes may be optimally designed in a new age of teaching and learning Features Benefits Part I provides an overview and includes discussion of the unique structural aspects of the electronic learning environment pedagogical issues curriculum design psychological and group dynamics and ethical issues Part II examines practical issues associated with implementing courses online both in the traditional university setting and in professional corporate training environments The book draws heavily on personal case examples many from The Fielding Graduate Institute s 26 years of teaching in nontraditional distributed learning environments

Encyclopedia of Networked and Virtual Organizations Goran Putnik, Maria Manuela Cunha, 2008 This book documents the most relevant contributions to the introduction of networked dynamic agile and virtual organizational models definitions taxonomies opportunities and reference models and architectures It creates a repository of the main developments regarding the virtual organization compiling definitions characteristics comparisons advantages practices enabling technologies and best practices Provided by publisher

Current Index to Journals in Education, 2001
