**in Beauty Products Advertisements** Ida Skubis, Dominika Kołodziejczyk, 2024-11-21 This book systematically investigates the linguistic strategies employed in beauty product advertising to assess their persuasive and manipulative effects The work

is divided into two sections a review of relevant literature and an empirical analysis of advertisements The analysis initially focuses on the linguistic features of advertisements created by humans prior to the introduction of ChatGPT examining the linguistic measures used and their methods of persuasion and manipulation Subsequent sections provide a detailed examination of advertisements generated by ChatGPT versions 3.5 and 4.0 analysing the artificial intelligence's use of linguistic techniques This includes a meta analysis where ChatGPT itself discusses the linguistic strategies it employs The ultimate goal is to compare and contrast the effectiveness and linguistic devices used in advertisements crafted by humans and those by ChatGPT analysing how AI influences the language of advertising and its impact on consumer behaviour

FROM CODE TO CREATIVITY: THE GENERATIVE AI REVOLUTION Dr. Anish R. Khobragade, 2024-09-09 One important

reason why digital technologies are advancing so quickly right now is the emergence of generative AI. We have managed new methods and tools for performing tasks across several sectors with the assistance of this innovation and we have also been able to produce highly innovative and helpful stuff. All the experts agree that AI will have a bigger impact on the economy in the next years. The unprecedented revolution in the area of Artificial Intelligence is the driving force behind these high expectations which are based on the substantial demand for these technologies. A broad range of research suggests that AI will significantly alter our planet's landscape in the years to come. We have witnessed AI's profound impact on people's interactions with recent technological and machines now they can harness this power to propel diverse and adaptable innovations that can keep up with the lightning fast pace of cultural and technological change while also opening up fulfilling new avenues for exploration. The UAE is eager to stay ahead of the curve in terms of new technology so that it can study how to best use generative AI in various domains like education, healthcare, media, advanced sciences and more in accordance with the directives of its wise leadership to prepare for the future. With 100 million users between November 2022 and January 2023 and over one million users in the first five days, Chat GPT's launch has drawn an extraordinary turnout. The government of the United Arab Emirates (UAE) has brought out the Generative Artificial Intelligence Guide in reaction to these changes; the document seeks to handle the challenges as well as potential that this technology brings. Data privacy security within the context of these digital breakthroughs is also covered in the book along with numerous prompt models that may be employed to get optimum and effective AI replies.

**Beyond Code** Daniel Plate, James Hutson, 2025-09-02 AI-powered coding tools are revolutionizing software development, transforming programming from a specialized skill into an accessible educational practice across disciplines. This book investigates how tools such as Cursor AI, GitHub Copilot, and Replit's Ghostwriter are dismantling traditional barriers to entry for learners, particularly those from non-STEM backgrounds, by enabling natural language code generation, intelligent debugging, and interactive project-based learning. Bridging the gap between theoretical instruction and practical application, the book serves as both a guide and a critical framework for integrating generative AI into curricula. It highlights how these tools expand the boundaries of programming education by supporting interdisciplinary applications from literary analysis to creative writing, thereby making coding relevant and actionable for students in the humanities and beyond. The book equips educators with the tools and strategies necessary to incorporate AI-assisted programming into diverse academic contexts by offering lesson plans and adaptable project models. This resource is essential for instructors seeking to demystify coding, promote inclusivity in technical learning, and reimagine the role of software literacy in the twenty-first century classroom.

**The Future of No Work** Filip Drimalka, 2024-01-01 We have been told for ages that technology would make our lives easier. Instead, we increasingly find ourselves drowning in tedious tasks and feeling trapped in the daily grind, overflowing calendars, endless to-do lists, and a never-ending stream of interruptions. And since we're always connected, our work never seems to end. Imagine a world where technology finally starts taking care of all

the boring stuff so you can focus on what really matters to you Where smart AI apps empower you to create anything you can imagine and even things you never would have thought of Where you have the power to redesign work around your life not the other way around This is the era of No Work It s not about escaping work but about using our skills and leveraging the possibilities unlocked by AI so that our days are primarily comprised of the things we are passionate about Because that s how we can create something extra ordinary Inside this book you ll find hundreds of practical examples and tips How to find select and use the right digital tools for anything you do How to make your productivity skyrocket with AI and reclaim your time How to do things your way with greater freedom by automating more tasks How to craft the work you want whether you re an entrepreneur or an employee How to seize new opportunities and build a future proof career The book will provide you with loads of tips on the best apps and tools that are part of the AI revolution but the real magic is how it changes the way you think You ll learn new skills and timeless principles that will keep you ahead of the game no matter how AI changes the way we work FILIP DRIMALKA pronounced like Phil Dream is a digital innovation expert and a sought after European consultant on technology adoption He is the founder of Digiskills Digitask and Digi Challenge projects that are helping hundreds of companies and tens of thousands of individuals upskill and thrive in the digital age Filip resides in the Central European hot spot Brno with his wife and two children When he s not driving digital transfor mation you can find him skiing surfing or mountain biking He doesn t just write about No Work He actually lives it
