GET YOUR COPY TODAY **The PMM's Prompt Playbook** David E. Sweenor, 2025-02-18 Product marketers face mounting pressure to deliver more content campaigns and insights with limited time and resources Unfortunately most are using elementary prompts and struggle to incorporate generative AI into their daily workflows in ways that save time and drive impact As a marketing leader with 20 years in data and analytics I've tested hundreds of AI workflows and have identified what actually works for B2B product marketing The PMM's Prompt Playbook Mastering Generative AI for B2B Marketing Success distills that experience into practical workflows that help you better understand customer needs build rich personas analyze competitors enable sales teams and plan product launches There are no theoretical discussions about AI potential just proven prompt driven workflows that cut research time accelerate content creation and improve marketing outcomes Each chapter walks through specific workflows that are refined through real world applications You'll learn how to extract insights from customer feedback create targeted content for different buyer personas build compelling product narratives and accelerate launch planning This is a practical guide for working smarter Want to analyze a competitor's positioning in minutes instead of hours Need to generate targeted content for five different personas Looking to speed up launch planning without sacrificing quality The workflows in this playbook show you how Written for busy product marketers who need proven solutions this guide helps you deliver quick wins that drive real business impact Every prompt and process has been tested and refined through hands on experience in B2B technology marketing Remember it's not the tech that's tiny just the book *General Aspects of Applying Generative AI in Higher Education* Mohamed Lahby, Yassine Maleh, Antonio Bucchiarone, Satu Elisa Schaeffer, 2024-09-27 This book explores the transformative impact of generative artificial intelligence GenAI on teaching and learning examining how recent advancements in GenAI are revolutionizing educational practices across disciplines The book is organized into three parts an overview of GenAI in education its application in diverse educational contexts and future perspectives on how educators and GenAI can interface The first part addresses the pressing concerns within the educational landscape both the bridges GenAI allows us to build and the remaining as well as the emerging gaps The middle part explores specific academic disciplines such as history sports medicine mathematics engineering and the humanities dissecting the influence of GenAI on each The final part looks ahead discussing the ethical implications the evolving role of prompting and innovative frameworks for personalized learning By presenting a balanced view of the opportunities that are now within reach through GenAI and the challenges such leaps pose to the way we learn and teach this book allows interested educators to learn from the early adopting contributors to fruitfully and responsibly integrate such technologies into their pedagogical practices It serves as a resource for anyone interested in the future of educational practices and research of education offering insights that can spark further exploration and discussion within the academic community and educational policy makers *Towards HRI of Everyday Life* Karolina Zawieska, Mohammad Obaid, Wafa Johal, Jessica Sorenson, Catharina Vesterager Smedegaard, Glenda Hannibal, 2025-10-03 Presently it is often assumed

that at least in principle robots and social robots in particular have the potential to increase human well being across a wide range of sectors and application areas At the same time efforts to introduce such systems into our everyday environments have had only limited success and it is yet to be seen whether the impact of social robots on our daily lives professional and private will actually be beneficial Therefore there is a need to systematically address and study the long term use and presence of social robots in everyday environments where humans not only interact with robots but also have them integrated into the totality of their lived experiences in everyday life One of the main ways to investigate human engagement with social robots in everyday environments is through HRI studies conducted in the wild While such an approach has certainly been instrumental to and is increasingly used in HRI research we propose here to further expand the underlying theoretical and methodological frameworks to address the notion of everyday life The latter is viewed here as a useful concept and an umbrella term that allows us to address not only specific application domains for robots but also the continuity and totality of human lived experiences that emerge through long term engagement with social robots in everyday life contexts Placing social robots in everyday settings has often been an explicit goal for robot development however the notion of everyday life has yet to be systematically analysed and addressed in this context Therefore this Research Topic aims to bring together a wide range of disciplinary and interdisciplinary contributions to further develop the HRI domain
