Advanced Ai Slideshow Maker:

Digital Competence Development in Early Childhood Professionals Sarika Kewalramani, Weipeng Yang, Maria Dardanou, Maria Hatzigianni, 2025-12-04 This book examines innovative recent developments in curricula and pedagogical discourses around early childhood professionals digital competence development via professional development avenues By expanding the notion of digital technologies integration teaching perspectives and educators practices in early childhood education the authors not only conceptualise a professional development model but also apply the model to bring together research across cultural contexts Presenting findings from four cases it offers research informed tangible examples of teacher centric professional development one that inspires early childhood professionals teacher educators and pre service teachers to use a variety of multimodal technologies within their repertoire of play based practices e g STEM focused play for and with young children teaching computational thinking Case studies in this book are evidence of how practitioners can come together to build communities of practice to support their digital competence development as critical pedagogues and integrate a variety of evolving technology based play e g AI platforms while engaging in paradigmatic debates Readers will better appreciate the growth in pragmatic applications of technologies together with theoretical perspectives and methodological approaches This will be a valuable resource for any academic or practitioner whether beginning or expert in understanding how digital competence development occurs through cultural learnings is inclusive not discipline based is holistic In reframing early childhood professionals digital competence development as a naturalistic process it will inspire educators to integrate a range of digital and multimodal technologies in their everyday practices Yearly Proceedings of A.I. & S.E.E. Containing Transactions as Appeared in Iron and Steel Engineer ... Association of Iron and Steel Engineers, 1924

Algorithms of Armageddon George Galdorisi, Sam J Tangredi, 2024-03-12 It is unclear if U S policy makers and military leaders fully realize that we have already been thrust into an artificial intelligence AI race with authoritarian powers Today the United States peer adversaries China and Russia have made clear their intentions to make major investments in AI and insert this technology into their military systems sensors and weapons Their goal is to gain an asymmetric advantage over the U S military The implications for our national security are many and complex Algorithms of Armageddon examines this most pressing security issue in a clear insightful delivery by two experts Authors George Galdorisi and Sam J Tangredi are national security professionals who deal with AI on a day to day basis in their work in both the technical and policy arenas Opening chapters explain the fundamentals of what constitutes big data machine learning and artificial intelligence They investigate the convergence of AI with other technologies and how these systems will interact with humans Critical to the issue is the manner by which AI is being developed and utilized by Russia and China The central chapters of the work address the weaponizing of AI through interaction with other technologies man machine teaming and autonomous weapons systems The authors cover in depth debates surrounding the AI genie out of the bottle controversy AI arms races and the

resulting impact on policy and the laws of war Given that global powers are leading large scale development of AI it is likely that use of this technology will be global in extent Will AI enabled military weapons systems lead to full scale global war Can such a conflict be avoided The later chapters of the work explore these questions point to the possibility of humans failing to control military AI applications and conclude that the dangers for the United States are real Neither a protest against AI nor a speculative work on how AI could replace humans Algorithms of Armageddon provides a time critical understanding of why AI is being implemented through state weaponization the realities for the global power balance and more importantly U S national security Galdorisi and Tangredi propose a national dialogue that focuses on the need for U S military to have access to the latest AI enabled technology in order to provide security and prosperity to the American people *Photography*

Carroll Bernard Neblette,1927 **Educational Motion Pictures, Filmstrips, Lantern Slides, Recordings** Michigan State University. Audio-Visual Center,1969 **Digital Twins, Simulation, and the Metaverse** Michael Grieves,Edward Y. Hua,2024-10-25 Dive into the fascinating world of Digital Twins Simulation and the Metaverse where the virtual digital and physical worlds collide and reshape industries This book offers an insightful exploration of the revolutionary applications of these technologies promising to ignite your imagination and inspire innovation The topics described in this book represent a groundbreaking exploration of the synergistic relationship between digital twins simulation and the metaverse as well as their transformative impact across various sectors In addition to presenting theoretical discussions and experimental findings this book focuses on real life applications and illuminates the path for future research This makes it a must read for both industry and academia keen on understanding and harnessing the power of the emerging technologies Topics and features Discover from top thought leaders the predictions of how digital twins simulation and metaverses will evolve in direction requirements and capabilities Exploit the understanding of how digital twin metaverses will revolutionize the effectiveness and efficiency of 21st century work Explore cutting edge real life applications of digital twins simulation and the metaverse spanning a diverse array of industries and sectors Understand the different views and perspectives of digital twins and metaverses shared by academia industry and government authors from around the world Learn how to harness the power of simulation in the world of digital twins and metaverses This unique volume consists of works from internationally renowned experts representing a diverse array of industries and sectors It will be eminently suitable for researchers and practitioners working on modeling and simulation digital twins and the metaverse Furthermore this volume will serve as a valuable reference for executives and decision makers who are looking to leverage these cutting edge technologies to expand their businesses develop industrial and national strategies and support future missions *Popular Photography* ,1994-10
