Sivabalaselvamani, G. Revathy, Ranjit Singh Sarban Singh, 2025-09-25 Advanced AI and Data Science Applications explores how the latest developments in artificial intelligence AI and data science are transforming diverse domains. The book blends theory and practice to serve as a roadmap to help readers understand how these cutting edge technologies are revolutionizing practices across various fields By providing a mix of theoretical insights and practical implementations the book offers a holistic understanding of advanced AI and data science applications Highlights of the book include Metaheuristic optimization techniques for solving complex AI model training challenges The impact of AI and data science on urban development Implementing AI for enhanced cybersecurity in industrial control systems A comparative study of traditional and AI based methods for English speech recognition Temporal dependency modeling in real time data streams using a deep learning model Predictive analytics for financial fraud detection and risk management Data science in manufacturing for cost

reduction and efficiency AI driven agricultural analytics Featuring such advanced modeling techniques as predictive modeling simulation and optimization algorithms the book presents innovative solutions that emphasize benefits and practicality With its emphasis on interdisciplinary applications it showcases successful projects that underscore the synergy between AI and data science domains empowering readers to harness the power of innovation for enhanced problem solving Global Education Monitoring Report Global Education Monitoring Report and efficiency in interdisciplinary realms Intelligent Technology for Educational Applications Kean Wah Lee, Lung Hsiang Team.UNESCO.2025-08-13 Wong, 2025-04-17 This book constitutes the refereed proceedings of the First International Conference on Intelligent Technology for Educational Applications ITEA 2024 held in Kuala Lumpur Malaysia during July 20 22 2024 The 10 full papers and 4 short papers included in this book were carefully reviewed and selected from 34 submissions. These papers focus on pioneering research innovative applications and insightful perspectives from various research areas of intelligent educational technologies The Handbook of Artificial Intelligence and Journalism Aynur Sarısakaloğlu, Martin Löffelholz, 2025-12-23 Presents a comprehensive global overview of AI driven journalism and its transformative impact on media practices As artificial intelligence AI continues to reshape the media landscape The Handbook of Artificial Intelligence and Journalism provides the first comprehensive academic exploration of the intersection between AI technologies and journalism Edited by Aynur Sar sakalo lu and Martin L ffelholz this foundational volume brings together 37 leading scholars from six continents to examine how AI is redefining the structures practices and epistemologies of journalism Organized around key thematic areas the Handbook investigates the driving forces propelling the algorithmic transformation and unveils emerging trends in journalistic practice and journalism research moving beyond Western centric perspectives to incorporate diverse global experiences and knowledge production Twenty eight original chapters address systemic shifts such as evolving structures of media organizations changing roles of actors transformations in news production routines and shifting patterns of news consumption By integrating theoretical empirical and practical perspectives the Handbook sets the stage for a new research agenda for understanding AI driven journalism on a global scale Containing rigorous interdisciplinary scholarship and broad geographical coverage The Handbook of Artificial Intelligence and Journalism Integrates theoretical foundations empirical studies and practical applications in a cohesive structure Offers insights into journalism practices across a wide range of geographical contexts and engages with approaches that transcends Western dominated paradigms incorporating perspectives from the Global South Employs interdisciplinary frameworks to enhance the understanding of AI driven journalism Examines the sociotechnical dynamics of AI including its potential benefits and challenges for journalism Presents forward looking reflections on the future of journalism research in the AI era The Handbook of Artificial Intelligence and Journalism is ideal for undergraduate graduate and doctoral students in journalism communication and media studies programs It also serves as a vital reference for researchers educators media professionals and policy advisors engaged in
