Artificial Intelligence in Records and Information Management Mutsagondo, Samson, 2025-04-11 As trending and general technology of the day artificial intelligence AI has permeated every facet of life such as medicine commerce health as well as media The records management domain is no exception Records and information management benefit from AI by being relieved of many tedious processes that are may be easily subjected to manual oversight Thus through AI compliance security and efficiency in records management can be greatly enhanced Artificial Intelligence in Records and Information Management outlines and assesses the role and contribution of AI in the records and information management domain It establishes how records and information management can benefit from the application of artificial intelligence inclusive of all its sub technologies Covering topics such as archival software data governance and academic scholarship this book is an excellent resource for records officers records managers information professionals archivists documentalists information and communication technology ICT professionals heritage managers museologists historians archaeologists media professionals professionals researchers scholars academicians and more *Advanced Methods, Equipment and Platforms in Precision Field Crops Protection, volume II* Jun Ni, Peter Yuen, Jingcheng Zhang , Ning Yang, 2025-11-05 Diseases pests and weeds have severely affected the production of crops Traditional agriculture solves the above problems by large scale chemical spraying but excessive pesticides can also seriously affect the growth of crops and pollute the environment Therefore it is necessary to use modern technologies to protect field crops accurately Collect and analyze the characteristics and location information of diseases pests and weeds as early as possible with equipment and methods and use various platforms to complete the precise protection of field crops This Research Topic welcomes submissions that address precision crop protection research and demonstrate how smart control strategies sensor technology and operational platforms can be integrated into actual crop protection We welcome submissions of original research articles reviews and methods including but not limited to research on the following sub themes 1 Real time monitoring and detection sensors for diseases pests and weeds 2 Intelligent crop protection methods based on artificial intelligence 3 Phenotypic parameter analysis of weeds and affected crops 4 Precision variable rate equipment and system for crop protection 5 Digital twin models novel IoT technologies and cloud platform for crop protection 6 Advances innovations and new trends in modern technologies for crop protection and development

How to Use Digital Learning with Confidence and Creativity Gearóid Ó Súilleabháin, Donna Lanclos, Tom Farrelly, 2024-06-05 How to Use Digital Learning with Confidence and Creativity is an accessible guide to key topics in the complex field of digital learning It offers advice and insights on a range of ethical pedagogical ideological and strategic challenges arising at the intersection of digital technology and teaching practice **Augmented Education in the Global Age** Daniel Araya, Peter Marber, 2023-03-23 Augmented Education in the Global Age Artificial Intelligence and the Future of Learning and Work is an edited collection that explores the social impact of Artificial Intelligence over the coming decades

specifically how this emerging technology will transform and disrupt our contemporary institutions Chapters in this book discuss the history of technological revolutions and consider the anxieties and social challenges of lost occupations as well as the evolution of new industries overlapping robotics biotechnology space exploration and clean energy Chapter authors unpack the nature of augmented education from revamping curriculum and personalizing education to redesigning workplace learning for an algorithmic era Ultimately the book discusses policy and planning for an augmented future arguing that work and learning are undergoing a metamorphosis around creativity and innovation amid a new global era and the race against automating technologies Bringing together expert perspectives from around the world this exciting informative collection of research and analysis helps educators policymakers and analysts navigate the future of work and learning amid rapid and accelerating technological change The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Teaching and Learning in the Age of Generative AI Joseph Rene Corbeil, Maria Elena Corbeil, 2025-04-30 Teaching and Learning in the Age of Generative AI explores how educators can effectively harness the potential of artificial intelligence technologies while skillfully navigating its pedagogical technical ethical institutional and societal implications The increasing accessibility of AI technologies among K-12 and higher education students has raised extensive concerns around academic integrity though a deeper lineage of research and development suggests that these tools may be used to supplement instruction prioritize critical thinking and promote digital literacy Bookended by in-depth analyses of the historical and future trajectories of artificial intelligence in education this comprehensive resource provides evidence-based strategies for classroom implementation and helpful summaries of common benefits and risks Teaching assistance personalized learning redefined assessments anti-bias measures and safeguards against misconduct and privacy infringement are among the wealth of topics addressed in these chapters This book is an ideal text for undergraduate and graduate students of teacher education and curriculum and instruction as well as for higher education teaching faculty school technology coordinators and talent development personnel in training and in service

Advanced Anomaly Detection Technologies and Applications in Energy Systems Tinghui Ouyang, Yusen He, Xun Shen, Zhenhao Tang, Yahui Zhang, 2025-02-17 Anomaly detection is an important topic which has been well studied in diverse research areas and application domains It generally involves detection of abnormal data unhealthy status fault diagnosis and can be helpful to guarantee industrial systems stability security and economy As development of intelligent industries and sensor systems grows large amounts of data become easily available and challenges arise in industrial systems anomaly detection One typical case is the study within energy-related systems like thermal energy renewable energy study e.g. wind energy photovoltaic electric vehicles and so on These systems can involve various data formats and more complex data structures making anomaly data detection a challenge Currently under the development of deep learning and big data analytics many promising results have been achieved in energy systems anomaly

data detection However many challenging problems remain unsolved due to the complex nature of energy industries New techniques and advanced engineering applications on anomaly detection in energy systems still appeal to a wide range of scholars and industries From Street-smart to Web-wise® Al Marcella,Brian Moore,Madeline Parisi,2025-03-13 In Book 3 fifth and sixth graders are maturing becoming more independent and online activities are second nature From Street smart to Web wise A Cyber Safety Training Manual Built for Teachers and Designed for Children isn't just another book it's a passionate call to action for teachers It is a roadmap to navigate the digital landscape safely with confidence and care as the critical job of ensuring students safety as the digital world expands Written by authors who are recognized experts in their respective fields this accessible manual is a timely resource for educators This book helps us dive into engaging content that illuminates the importance of cyber safety not only in our classrooms but also in the global community Each chapter is filled with practical examples stimulating discussion points and ready to use lesson plans tailored for students in fifth and sixth grades Regardless of your technology skill level this book will provide you with the guidance and the tools you need to make student cyber safety awareness practical fun and impactful As parents partner with educators to create cyber secure spaces this book stands as a framework of commitment to that partnership It's a testament to taking proactive steps in equipping our young learners with the awareness and skills they need to tread the digital world securely By choosing From Street smart to Web wise A Cyber Safety Training Manual Built for Teachers and Designed for Children you position yourself at the forefront of educational guardianship championing a future where our children can explore learn and grow online without fear Join us on this journey to empower the next generation one click at a time PC ,1986-11 *PC Magazine* ,1986
