Advanced Machine Learning Dr. Amit Kumar Tyagi, Dr. Khushboo Tripathi, Dr. Avinash Kumar Sharma, 2024-06-29

DESCRIPTION Our book is divided into several useful concepts and techniques of machine learning. This book serves as a valuable resource for individuals seeking to deepen their understanding of advanced topics in this field. Learn about various learning algorithms including supervised, unsupervised, and reinforcement learning and their mathematical foundations. Discover the significance of feature engineering and selection for enhancing model performance. Understand model evaluation metrics like accuracy, precision, recall, and F1 score along with techniques like cross-validation and grid search for model selection. Explore ensemble learning methods along with deep learning, unsupervised learning, time series analysis, and reinforcement learning techniques. Lastly, uncover real-world applications of the machine and deep learning algorithms. After reading this book, readers will gain a comprehensive understanding of machine learning fundamentals and advanced techniques. With this knowledge, readers will be equipped to tackle real-world problems, make informed decisions, and develop innovative solutions using machine and deep learning algorithms.

KEY FEATURES Basic understanding of machine learning algorithms via MATLAB, R, and Python. Inclusion of examples related to real-world problems, case studies, and questions related to futuristic technologies. Adding futuristic technologies related to machine learning and deep learning.

WHAT YOU WILL LEARN Ability to tackle complex machine learning problems. Understanding of foundations, algorithms, ethical issues, and how to implement each learning algorithm for their own use with their data. Efficient data analysis for real-time data will be understood by researchers, students, and using data analysis in near-future topics and cutting-edge technologies.

WHO THIS BOOK IS FOR This book is ideal for students, professors, and researchers. It equips industry experts and academics with the technical know-how and practical implementations of machine learning algorithms.

Data-Driven Diagnostics and Disease Prediction with AI Optimization Shailendra Pratap Singh, Prabhishek Singh, Manoj Diwakar, Vinayakumar Ravi, 2025-10-01

Data Driven Diagnostics and Disease Prediction with AI Optimization provides useful insights into model creation, data preparation, and ethical issues for healthcare applications. The book covers all the conventional and non-conventional methods related to this domain. It also discusses AI-based optimization techniques, Machine Learning models, and Advanced AI, offering practical insights, case studies, and optimization strategies to help data scientists and researchers efficiently employ AI in diagnostics and illness prediction in a world where precise diagnostics and early illness prediction may save lives and healthcare resources. Provides a complete overview of the challenges and pain

points in implementing AI driven diagnostics and disease prediction within the healthcare industry Explores various edge computing applications in healthcare and the use of hardware acceleration for AI applications Presents a comprehensive resource that bridges the gap between AI and healthcare *Hybrid and Advanced Technologies* S. Prasad Jones Christydass,Nurhayati Nurhayati,S. Kannadhasan,2025-03-21 The proceedings of the International Conference on Hybrid and Advanced Technologies ICHAT 2024 present a rich repository of cutting edge research on the various applications of machine learning deep learning and AI in cybersecurity healthcare agriculture and communication systems It highlights the revolutionary potential of data science in transforming traditional practices improving efficiency and accuracy across diverse domains and addressing complex real world challenges These proceedings contains innovative neural network models for agriculture that can predict tractor fuel consumption and optimize smart irrigation besides suggesting greenhouse automation for enhanced agricultural productivity It also provides a roadmap for IoT based monitoring systems for asthma patients and machine learning approaches for early detection of diabetes cancer and aquatic plant ailments Through an array of practical examples and comparative studies the book further highlights advancements in machine learning for enhancing palm vein authentication combating fake news keeping data safe and improving customer segmentation in e commerce The findings would be instrumental in combating critical global issues and foster a deeper understanding of the role of AI in image processing cybersecurity medical diagnostics and intelligent systems in the future This will be a highly interesting guide to researchers data scientists and practicing professionals in the fields of artificial intelligence machine learning and cybersecurity It will also be of interest to healthcare professionals agricultural scientists and technology enthusiasts in fostering global collaborations exploring future challenges and opportunities and introducing state of the art technologies to streamline processes **Advanced IoT Technologies and Applications in the Industry 4.0 Digital Economy** Alex Khang,Vugar Abdullayev,Vladimir Hahanov,Vrushank Shah,2024-02-27 The application of internet of things IoT technologies and artificial intelligence AI enabled IoT solutions has gradually become accepted by business and production organizations as an effective tool for automating several activities effectively and efficiently and developing and distributing products to the global market Within this book the reader will learn how to implement IoT devices IoT equipped machines and AI equipped IoT applications using models and methodologies along with an array of case studies Advanced IoT Technologies and Applications in the Industry 4 0 Digital Economy covers the basics of IoT equipped machines in developing and managing various activities in many industries It discusses all of the key points of an AI enabled IoT solution which includes predictive analytics robotic process automation predictive maintenance automated processes IoT technologies and IoT equipped sensors related to machines and processes production testing systems and product assessment processes in the production environment The book presents the concepts and interactive methods using datasets processing workflow charts and architectural diagrams along with additional real time systems for easy and fast understanding of the application of IoT

equipped machines and AI enabled solutions in organizations and includes many case studies throughout the book to enforce reader comprehension This book is an ideal read for industry specialists practitioners researchers scientists and engineers working or involved in the fields of Robotics IT Computer Science Soft Computing IoT AL ML DL Data Science the Semantic Web Knowledge Engineering and other related fields Digital Organization Tips for Music Teachers Robby Burns,2016-09-01 Are you a music teacher searching for sanity in the midst of all your chaotic responsibilities Music teachers have to do so much more than teach music They have to be master musicians educators and conductors all while balancing other professional disciplines like arranging composing trip planning financing and more The parts of the job that take our sights off of great teaching must be managed so that we can focus on what counts the music If you are feeling overwhelmed by the logistics of your job you are in luck there is an app for that Actually a lot of apps And Digital Organization Tips for Music Teachers is here to tell you all about them Whether you can barely turn your computer on or if you are just looking for tips on how to make your work more efficient there is something in store for you The technologies in this book are presented in bite sized descriptions of desktop and mobile apps followed by applications of how they can solve specific problems that music teachers experience every day Each chapter covers a different type of data that music teachers have to organize ranging from notes to tasks to scores and audio recordings *Artificial Intelligence and Public Law* Brendan McGurk KC,Joe Tomlinson,2025-06-26 The Government s use of algorithmic based decision making is rapidly expanding across policy areas including immigration social security regulation security and policing This book provides the first comprehensive analysis of how public law applies to the use of artificial intelligence and automation in the public sector in England and Wales Starting with an accessible account of the nature of AI and automated systems being increasingly deployed in the public sector the book covers the various legal regimes which regulate their use It considers how the principles of judicial review might be deployed to challenge automated decision making by public authorities It also explains how equality law human rights law procurement law data protection law and private law apply to government use of AI and automation This book is a vital guide for practitioners in both private practice and government and for anyone navigating this quickly changing complex and uncertain environment **Advanced Practice in Endocrinology Nursing** Sofia Llahana,Cecilia Follin,Christine Yedinak,Ashley Grossman,2019-02-26 This book provides a comprehensive guide for nurses practicing in any area of endocrinology and at any level of expertise Endocrinology Nursing is a fast developing specialty with nurses performing advanced roles and expanding their practice to run independent nurse led services Supported by the European Society of Endocrinology ESE and edited by members of the ESE Nurses Working Group this is the first book ever published specifically for endocrine nurses It is also an excellent resource for endocrinology specialty trainees general practitioners medical and nursing students expert patients and nurses working in specialties such as fertility osteoporosis oncology obesity urology and gynaecology who look after patients with endocrine related disorders This volume includes 13 sections and 69 chapters
