It also presents the latest trends in the development of the smart economy using big data and AI. Moreover, the book explains the socio ecological and legal aspects of the ethics in applying big data and AI technologies. Additionally, the book proposes prospective applied solutions for decision making in the smart economy based on big data and AI. The target audience of the book includes scientists studying big data and AI.

Beyond Code Daniel Plate, James Hutson, 2025-09-02 AI powered coding tools are revolutionizing software development transforming programming from a specialized skill into an accessible educational practice across disciplines. This book investigates how tools such as Cursor, AI, GitHub Copilot and Replit's Ghostwriter are dismantling traditional barriers to entry for learners particularly those from non STEM backgrounds by enabling natural language code generation, intelligent debugging and interactive project based learning. Bridging the gap between theoretical instruction and practical application, the book serves as both a guide and a critical framework for integrating generative AI into curricula. It highlights how these tools expand the boundaries of programming education by supporting interdisciplinary applications from literary analysis to creative writing thereby making coding relevant and actionable for students in the humanities and beyond. The book equips educators with the tools and strategies necessary to incorporate AI assisted programming into diverse academic contexts by offering lesson plans and adaptable project models. This resource is essential for instructors seeking to demystify coding, promote inclusivity in technical learning and reimagine the role of software literacy in the twenty first century classroom.

Library Space Planning and Design Alexander H. Cohen, 2025-03-19 Library Space Planning and Design discusses library planning methods to improve academic libraries, learning commons, undergraduate and graduate studies, special collections and archives. Often these projects required difficult challenges. For example, how to integrate student success centers or create new learning commons into a library. The book shows how a library plan can be both sustainable and attractive to the users and how to integrate library functions, furniture and equipment to enhance the learning environment. Case studies from the author's interactions with library staff, stakeholders and community leadership in the planning process are also included for additional clarity. Takes a multidisciplinary approach to library services and space planning. Includes case studies to act as unique learning opportunities and offers a customized methodology to support libraries of every kind. Covers comprehensive
