Never Enough Time Brian H. Spitzberg, 2025-10-24 Never Enough Time discusses the directional and irreversible nature of time, its relationship to information and entropy, the deep time history of communication from the genesis of language to today, and the extent to which we occupy time through our communication. Drawing together studies from a wide variety of disciplines and topics that provide quantitative estimates of how much daily time is expended communicating and relating to others, the author demonstrates that in an increasingly accelerating, mediated, and information-overloaded ecosystem, we spend most of our time both socially and occupationally engaged in various forms of communication. He examines the nature of time in the context of our increasingly overloaded and mediated information and communication ecosystem, the extent to which our increasing screen time displaces face-to-face interaction, and the implications this trend has for our quality and quantity of life, particularly for younger populations.
