Doc-Humanity Maurizio Ferraris,2022-09-12 However you view the present time it is a new century a new world and also a new humanity in fact humanity is not something that was ever defined once and for all but remains an open project For several decades we have been witnessing a revolution However unlike the political and ideological revolutions that took place around the First World War this is a technological and much more radical one that does not depend on people s beliefs but rather on the tireless labour of machines The rise of automation has brought about a revelation of something that had hitherto remained hidden in the workshops of homo faber That is there are very few functions apart from consumption where a machine cannot replace a human being be these material or spiritual machines need energy but they can also do without it whereas humans die if deprived of it or one can imagine a machine producing symphonies but not enjoying them So while human beings are still needed their roles and scopes have to be reconsidered Workers may be superfluous but humans are still needed including those who until recently only recognised themselves as producers The exclusion of workers from production does not discount humans being able to produce value in the form of consumption Recognising this will enable us to conceive the Webfare a new digital system that will teach us to find new names and new forms more tolerance and room for traditional human needs Above all it will teach us how to transform the time given to us by automation into an opportunity for progress

The Friction Project Robert I. Sutton,Huggy Rao,2024-01-30 The definitive guide to eliminating the forces that make it harder more complicated or downright impossible to get things done in organizations Find out why Adam Grant says If every leader took the ideas in this book seriously the world would be a less miserable more productive place Every organization is plagued by destructive friction Yet some forms of friction are incredibly useful and leaders who attempt to improve workplace efficiency often make things even worse Drawing from seven years of hands on research The Friction Project by bestselling authors Robert I Sutton and Huggy Rao teaches readers how to become friction fixers Sutton and Rao kick off the book by unpacking how skilled friction fixers think and act like trustees of others time They provide friction forensics to help readers identify where to avert and repair bad organizational friction and where to maintain and inject good friction Then their help pyramid shows how friction fixers do their work from reframing friction troubles they can t fix right now so they feel less threatening to designing and repairing organizations The heart of the book digs into the causes and solutions for five of the most common and damaging friction troubles oblivious leaders addition sickness broken connections jargon monoxide and fast and frenzied people and teams Sound familiar Sutton and Rao are here to help They wrap things up with lessons for leading your own friction project including linking little things to big things the power of civility caring and

As Public as Possible David I. Backer, 2025-12-02 A witty and provocative treatise on the financial policies we ll need to make our public schools work for all children From the anti CRT panic to efforts to divert tax dollars to charter schools the right wing attack on education has cut deep In response millions of Americans have rallied to defend their cherished public schools But this incisive book asks

whether choosing between our embattled status quo and the stingy privatized vision of the right is the only path forward In As Public as Possible education expert David I Backer argues for going on the offensive by radically expanding the very notion of the public in our public schools Helping us to imagine a more just and equitable future As Public as Possible proposes a concrete set of financial policies aimed at providing a high quality and truly public education for all Americans regardless of wealth and race With witty and provocative prose Backer shows how we can decouple school funding from property tax revenue evening out inequalities across districts by distributing resources according to need He argues for direct federal grants instead of the predations of municipal debt markets And he offers eye opening examples spanning the past and present from the former Yugoslavia to contemporary Philadelphia which help us to imagine a radically different way of financing the education of all of our children
