Openness to Creative Destruction Arthur M. Diamond, Jr., 2019-05-01 Life improves under the economic system often called entrepreneurial capitalism or creative destruction but more accurately called innovative dynamism Openness to Creative Destruction Sustaining Innovative Dynamism shows how innovation occurs through the efforts of inventors and innovative entrepreneurs how workers on balance benefit and how good policies can encourage innovation The inventors and innovative entrepreneurs are often cognitively diverse outsiders with the courage and perseverance to see and pursue serendipitous discoveries or slow hunches Arthur M Diamond Jr shows how economies grow where innovative dynamism through leapfrog competition flourishes as in the United States from roughly 1830 1930 Consumers vote with their feet for innovative new goods and for process innovations that reduce prices benefiting ordinary citizens more than the privileged elites Diamond highlights that because breakthrough inventions are costly and difficult patents can be fair rewards for invention and can provide funding to enable future inventions He argues that some fears about adverse effects on labor market are unjustified since more and better new jobs are created than are destroyed and that other fears can be mitigated by better policies The steady growth in regulations often defended on the basis of the precautionary principle increases the costs to potential entrepreneurs and thus reduces innovation The Great Fact of economic history is that after at least 40 000 years of mostly poor nasty brutish and short humans in the last 250 years have started to live substantially longer and better lives Diamond increases understanding of why Congressional Record United States. Congress, 1979 **Researching Entrepreneurship** Per Davidsson, 2005-06-21 Entrepreneurship is a phenomenon of tremendous societal importance It is also an elusive phenomenon and researching entrepreneurship is therefore fun fascinating and frustrating at times In Researching Entrepreneurship one of the most highly recognized entrepreneurship scholars shares in a personal and readable way his rich experience and ideas on how entrepreneurship can or should be researched After a comprehensive treatment of entrepreneurship as societal phenomenon and scholarly domain the core chapters of the book discuss design sampling operationalization and analysis issues on several levels of analysis individual venture firm industry region and nation The author provides numerous examples of problems and solutions from real research projects as well as experienced based suggestions for further improvements in future work The book is targeted primarily at doctoral students and other relative newcomers to the field of entrepreneurship research However taking a fresh reflective perspective and looking beyond research conventions it should provide potential for inspiration and food for thought also for experienced entrepreneurship researchers Moreover while the examples are taken from entrepreneurship research the book provides a unique experienced empirical researcher rather than textbook method expert treatment of issues that are of equal relevance across the social sciences This goes for topics such as the role of theory qualitative vs quantitative research validity checking statistical inference and replication Per Davidsson is Professor in Entrepreneurship at Brisbane Graduate School of

Management QUT Australia and J nk ping International Business School Sweden He is also Chair of the Research Committee of the Entrepreneurship Division of the American Academy of Management

*'Salt of the Earth'* Salena Zito, 2024-12-04 Despite the wealth of information at our fingertips in the information age there is a glaring emptiness that plagues us in our storytelling We remove nuance and replace it with sensationalism We shun original stories because they stray too far from the pack In the process we miss the beauty pain and magic the simplicity and grace of simple real life stories about the ordinary lives of people who work the soil to make America possible The result is that we lose touch with who we are as a nation In this collection of syndicated columns from 2023 and 2024 Zito pays attention to those stories From talking with workers in small towns to covering the biggest political figures of our time Zito paints a picture of where the country is after the midterm elections all the way through the final summer of presidential campaigning She approaches each subject with compassion and curiosity and strives to ensure that no everyman is forgotten or ignored
