Misinformation Matters Uyiosa Omoregie, Kirsti Ryall, 2023-04-19 What is misinformation Why does it matter How does it spread on the internet especially on social media platforms What can we do to counteract the worst of its effects Can we counteract its effects now that it is ubiquitous These are the questions we answer in this book We are living in an information age specifically an algorithmic age which prioritizes information quantity over quality Social media has brought billions of people from across the world together online and the impact of diverse platforms such as Facebook WeChat Reddit LinkedIn Signal WhatsApp Gab Instagram Telegram and Snapchat has been transformational The internet was created with the best of intentions as an online space where written content could be created consumed and diffused without any real intermediary This empowering aspect of the web is still mostly a force for good People on the whole are better informed and online discussion is more inclusive because barriers to participation are reduced As activity online has grown however an expanding catalogue of research reveals a darker side to social media and the internet generally Namely misinformation s ability to negatively influence our behaviour both online and offline The solution we provide to this growing dilemma is informed by Ludwig Wittgenstein s Tractatus Logico Philosophicus which examines the relationship between language and reality from a philosophical perspective and complements Claude Shannon s Information Quantity Theory which addresses the quantification storage and communication of digital information from a mathematical perspective The book ends by setting out a model designed by us a Wittgensteinian approach to information quality It defines content published online by clarifying the propositions and claims made within it Our model s online information quality check allows users to effectively analyse the quality of trending online content This approach to misinformation analysis and prevention has been designed to be both easy to use and pragmatic It upholds freedom of speech online while using the harm principle to categorise problematic content
