Hamilton Standard Propeller Specifications:

Inventory of Federal Archives in the States, 1938 Inventory of Federal Archives in the States Historical Records Survey (U.S.), 1938 Skyhookers William Wolf, 2025-12-30 From the First World War's Zeppelins to the Second World War's large bombers military aircraft were vulnerable to fast manoeuvrable interceptors To address this fighter escorts were used but their limited range often left bombers exposed A solution was the use of Composite aircraft where larger bombers carried smaller short range fighters which could be launched and retrieved as needed Zeppelins particularly vulnerable to interceptors were ideal for this concept During the First World War Germany briefly experimented with carrying parasite aircraft while the British conducted post war trials using airships like His Majesty's Airship R 23 and R 33 carrying fighters such as the Sopwith Camel and de Havilland DH 53 Humming Bird However successful hook on retrievals were only achieved with the Humming Bird The US Navy and Army further developed this concept In 1918 the Navy launched a Curtiss JN Jenny from a C 1 Blimp and in 1924 the Army successfully flew a Sperry Messenger from a TC Class airship The US perfected the carry launch retrieval method for airship defence and scouting notably with the USS Los Angeles which carried aircraft on a trapeze device The Akron and Macon airships with internal storage for aircraft further advanced this technique making them some of the most remarkable aircraft of their time **Tests of Five Full-scale Propellers in the Presence of a Radial and a Liquid-cooled Engine Nacelle** David Biermann, Edwin Phelps Hartman, United States. National Advisory Committee for Aeronautics, 1938 **Preliminary Model Specification, Lycoming Model LTC1F-3 Turboprop Engine, Specification No. 104.25** Avco Corporation. Lycoming Division.
