The Aesthetics of Net Literature Peter Gendolla, Jörgen Schäfer, 2007 During recent years literary texts in electronic and networked media have been a focal point of literary scholarship using varying terminology In this book the contributions of internationally renowned scholars and authors from Germany USA France Finland Spain and Switzerland review the ruptures and upheavals of literary communication within this context The articles in the book focus on questions such as In which literary projects can we discover a new quality of literariness What are the terminological and methodological means to examine these literatures How can we productively link the logics of the play of literary texts and their reception in the reading process What is the relationship of literary writing and programming With contributions by Jean Pierre Balpe Susanne Berkenheger Friedrich W Block Philippe Bootz Laura Borrás Castanyer Markku Eskelinen Frank Furtwängler Peter Gendolla Loss Pequeño Glazier Fotis Jannidis Thomas Kamphusmann Mela Kocher Marie Laure Ryan Jörgen Schäfer Roberto Simanowski and Noah Wardrip Fruin

Digital Art History Anna Bentkowska-Kafel, Trish Cashen, Hazel Gardiner, 2005 This book looks at the transformation that Art and Art history is undergoing through engagement with the digital revolution Since its initiation in 1985 CHArt Computers and the History of Art has set out to promote interaction between the rapidly developing new Information Technology and the study and practice of Art It has become increasingly clear in recent years that this interaction has led not just to the provision of new tools for the carrying out of existing practices but to the evolution of unprecedented activities and modes of thought This collection of papers represents the variety innovation and richness of significant presentations made at the CHArt Conferences of 2001 and 2002 Some show new methods of teaching being employed making clear in particular

the huge advantages that IT can provide for engaging students in learning and interactive discussion It also shows how much is to be gained from the flexibility of the digital image or could be gained if the road block of copyright is finally overcome Others look at the impact on collections and archives showing exciting ways of using computers to make available information about collections and archives and to provide new accessibility to archives The way such material can now be accessed via the internet has revolutionized the search methods of scholars but it has also made information available to all However the internet is not only about access Some papers here show how it also offers the opportunity of exploring the structure of images and dealing with the fascinating possibilities offered by digitisation for visual analysis searching and reconstruction Another challenging aspect covered here are the possibilities offered by digital media for new art forms One point that emerges is that digital art is not some discreet practice separated from other art forms It is rather an approach that can involve all manner of association with both other art practices and with other forms of presentation and enquiry demonstrating that we are witnessing a revolution that affects all our activities and not one that simply leads to the establishment of a new discipline to set alongside others **DIS2000** Wendy Anne Kellogg, Daniel Boyarski, 2000

Conference Proceedings, 2002 **Aesthetics of digital poetry** Friedrich W. Block, Christiane Heibach, Karin Wenz, 2004 Edited by Christiane Heibach and Karin Wenz Essays by Mark Amerika Giselle Beiguelman Friedrich W Block Mark Bernstein Nika Bertram Simon Biggs Philippe Bootz John Cayley Florian Cramer Eduardo Kac Bill Seaman et al

Computer Art in Context SIGGRAPH., 1989 Imagination + Technology Phil Turner, 2020-02-17 Imagination is highly valued and sought after yet elusive and ill defined Definitions range from narrowly cognitive accounts to those which endow imagination with world making powers Imagination underpins our ability to speculate about the future and to re experience the past The everyday functioning of society relies on being able to imagine the perspectives of others and our sense of who we are depends on the stories our imaginations create Our soaring imaginations have taken us to the moon and allowed Einstein to race a light beam Unsurprisingly imagination underlies every aspect of human computer interaction from the earliest conceptual sketches through the realistic possibilities portrayed variously in well known tools as scenarios and storyboards through to the wilder shores of design fictions Yet curiously imagination is very rarely addressed directly in the design and HCI literature and is wholly missing from virtual reality This book addresses this gap in our accounts of how we imagine conceptualise design and use digital technologies Drawing on many years of practical and academic experience in human computer interaction together with a wide range of material from psychology design cognitive science and HCI seasoned with a little philosophy and anthropology Imagination Technology first considers imagination itself and the principal farthings of a new account Later chapters discuss the role of imagination in the design aesthetics use and experience of digital technologies before the concluding chapter focusses on the provocative nature of imagination The book will be stimulating reading for anyone working in the field of interactive technology and related areas whether academics

students or practitioners *Computer Graphics and Art* ,1976 **A Rhetoric of Aesthetic Engagement for the Arts and Humanities** Aimée Knight,2009 *Advances in Smart Vehicular Technology, Transportation, Communication and Applications* Tsu-Yang Wu,Shaoquan Ni,Jeng-Shyang Pan,Shu-Chuan Chu,2025-07-23 This book includes selected papers from the sixth International Conference on Smart Vehicular Technology Transportation Communication and Applications VTCA 2024 hosted by Shu Te University and Taiwan Association for Web Intelligence Consortium and is technically sponsored by National Kaohsiung University of Science and Technology and Nanchang Institute of Technology during April 16 18 2024 The book includes research works from engineers researchers and practitioners interested in the advances and applications in the field of vehicle technology and communication The book covers three tracks namely 1 vehicular electronics 2 intelligent transportation systems and applications and 3 vehicular networking security **The Practice of Art and Science** Gerfried Stocker,Andreas Hirsch,2017 The European Digital Art and Science Network was initiated in 2015 with the aim of connecting the microcosm and macrocosm of science with the digital arts The network is made up of renowned research institutions ESA CERN and ESO which collaborate with the Ars Electronica Futurelab to offer residencies for artists The seven European project partners represent cultural and artistic positions in Europe which are as strong as they are diverse in exhibitions at workshops and at conferences The book presents the artistic projects and residencies in powerful images and contributions by well known scientists and artists analyze the challenges posed by art and science
