Digital Intelligent Aeroengine Quanyong Xu,Jiali Yang,WenYu Cao,Zhongzhi Hu,Ai He,Kai Liu,2025-11-24 This open access book provides a deep dive into the digitalization and intelligent technologies transforming the field of aircraft engines offering insights into their critical importance and the challenges they aim to address As the aerospace industry faces increasing demands for efficiency sustainability and innovation digital and intelligent technologies have become essential tools in advancing aircraft engine design performance optimization and lifecycle management These technologies are reshaping the way engines are developed and maintained enabling breakthroughs in predictive maintenance real time diagnostics and cross disciplinary collaboration However achieving these advancements comes with significant challenges such as data integration simulation accuracy and the need for seamless coordination among multiple disciplines This book begins by examining the current state of digital engine technologies highlighting their role in improving design efficiency operational safety and cost effectiveness Through a detailed analysis it identifies critical obstacles such as the complexity of integrating heterogeneous data achieving high fidelity simulations and optimizing whole system performance in multi disciplinary contexts Moving beyond diagnostics the text explores innovative approaches like digital twin based simulation modeling which combines physical models with real world data to accurately predict engine behavior It also introduces advanced methods for creating enhanced whole engine system models enabling multi disciplinary collaboration to ensure design reliability and efficiency A significant portion of this book is dedicated to the concept of the digital thread a framework that ensures consistent data integration and automated workflows throughout the engine lifecycle By leveraging digital threads engineers can streamline design iterations reduce uncertainties and improve overall product quality HHAI 2023: Augmenting Human Intellect Paul Lukowicz,Sven Mayer,Janin Koch,John Shawe-Taylor,2023-07-15 Artificial intelligence AI has been much in the news recently with some commentators expressing concern that AI might eventually replace humans But many developments in AI are designed to enhance and supplement the performance of humans rather than replace them and a novel field of study with new approaches and solutions to the development of AI has arisen to focus on this aspect of the technology This book presents the proceedings of HHAI2023 the 2nd International Conference on Hybrid Human Artificial Intelligence held from 26 30 June 2023 in Munich Germany The HHAI international conference series is focused on the study of artificially intelligent systems that cooperate synergistically proactively responsibly and purposefully with humans amplifying rather than replacing human intelligence and invites contributions from various fields including AI human computer interaction the cognitive and social sciences computer science philosophy among others A total of 78 submissions were received for the main conference track and most papers were reviewed by at least three reviewers The overall final acceptance rate was 43% with 14 contributions accepted as full papers 14 as working papers and 6 as extended abstracts The papers presented here cover topics including interactive hybrid agents hybrid intelligence for

decision support hybrid intelligence for health and values such as fairness and trust in hybrid intelligence We further accepted 17 posters and 4 demos as well as 8 students to the first HHAI doctoral consortium this year The authors of 4 working papers and 2 doctoral consortium submissions opted for not publishing their submissions to allow a later full submission resulting in a total of 57 papers included in this proceedings Addressing all aspects of AI systems that assist humans and emphasizing the need for adaptive collaborative responsible interactive and human centered artificial intelligence systems which can leverage human strengths and compensate for human weaknesses while considering social ethical and legal considerations the book will be of interest to all those working in the field
