education first impressions connections passion and the value you might bring to the company you wish to work for For decades the perceived ideal candidate would have all of the above most of the above however a good candidate would have a four year college degree To a great extent an employer still would like someone with a four year college degree However I believe this is changing The need for those who work with their hands and those who are willing to work their way up through the various levels of an organization is becoming more and more desired by companies The time it will take you to earn your degree you could be making a nice living and will have accrued zero debt in the process Plus after working in an industry of your choice something you do have an interest in even a passion for you may be on equal footing with a newly hired college grad based on the four years you have been working in your industry of choice as you continue to work your way up through the company You will find the more value you bring to a company the more they will look to you to assume great responsibility Typically the more responsibility the greater the paycheck What makes this book timely is the fact as COVID 19 winds down we are seeing many labor shortages in many areas and industries Now is the absolute best time to go to an industry experiencing a labor shortage or enter one of the numerous industries researched in this book and get yourself the job you always wanted without the cost and time involved with getting a four year college education I have nothing against getting a degree and there are still many fields where they will always be mandatory however the trades service industries government railroads law enforcement plus many others will welcome you with open arms without the need for a four year degree I hope this book helps Legal and Estate Planning - Protecting Your Legacy and Rights. Expanding Horizons in Open and Distance Learning Jennifer Roberts, Mutuota Kigotho, Adrian Stagg, 2020-06-09 This book brings together a collection of articles that were presented at the Open and Distance Learning Association of Australia (ODLAA) conference in February 2017. The authors share the common agenda of creating meaningful research in the field of distance education. Distinct themes in educational research, including open distance and flexible education, emerged from the conference, and this collection addresses each of these themes. The themes explored include teaching and learning, playing an integral role in Open and Distance Learning (ODL) research, ways in which technology is used in the teaching of science subjects, how technology is applied in everyday lives, specifically in the areas of transport, accommodation, and in ordering food, the important and often neglected area of research related to staff development and competencies, research regarding Open Educational Practices (OEP), and the importance of distance education in developing countries where online interaction is often a challenge, largely because of the lack of stable internet connectivity. This book was originally published as a special issue of Distance Education. **The Times Index**, 2008 Indexes the Times and its supplements. *Remote data entry: A Complete Guide* Gerardus Blokdyk, 2018 Remote data entry: A
