Artificial Intelligence for Learning Donald Clark, 2020-08-13 Artificial intelligence is creating huge opportunities for workplace learning and employee development. However, it can be difficult for L & D professionals to assess what difference AI can make in their organization and where it is best implemented. *Artificial Intelligence for Learning* is the practical guide L & D practitioners need to understand what AI is and how to use it to improve all aspects of learning in the workplace. It includes specific guidance on how AI can provide content curation and personalization to improve learner engagement, how it can be implemented to improve the efficiency of evaluation, assessment and reporting, and how chatbots can provide learner support to a global workforce. *Artificial Intelligence for Learning* debunks the myths and cuts through the hype around AI, allowing L & D practitioners to feel confident in their ability to critically assess where artificial intelligence can make a measurable difference and where it is worth investing in. There is also critical discussion of how AI is an aid to learning and development, not a replacement, as well as how it can be used to boost the effectiveness of workplace learning, reduce drop-off rates in online learning, and improve ROI. With real-world examples from companies who have effectively implemented AI and seen the benefits, as well as case studies from organizations including Netflix, British Airways, and the NHS, this book is essential reading for all L & D practitioners needing to understand AI and what it means in practice. Chatbot Marketing Mastery Mike Buchnas, 2021 With sites like Facebook and Kik opening their platforms to automated messaging for companies chatbots have really exploded in popularity Facebook went from zero chatbots in February 2016 to 18 000 by

July of the same year Kik had approximately 300 000 000 registered users and those users exchanged 350 000 000 automated messages with the platform in the first seven months of its chatbot You've probably seen chatbots in action They are on all sorts of websites from major retail chains to mobile phone service providers and many other types of sites and apps At first you might think you're talking to a real person Usually a popup appears with a picture of an agent along with a name The agent asks something like May I help you with anything Or Do you have any questions Chatbots use artificial intelligence that is often quite advanced to answer many questions a user might have and in the event that the Chatbot Marketing Masterybot is unable to help the user it will usually ask the user to call email or fill out a support form or perhaps to check a FAQ page Chatbots are quite advanced and many of them can almost manage to fool users into thinking they are speaking to a real person This is beneficial because it allows companies to lower their overhead by using chatbots to replace customer service agents in many circumstances and only when the chatbot is unsuccessful in helping the customer must a real agent step in Chatbots have a few drawbacks but they also have many benefits In this guide you're going to learn more about how chatbots can be used for marketing and whether or not chatbots are a good fit for your business So let's get started
