*Ben Bernanke's Fed* Ethan S. Harris, 2008 Ben Bernanke's swearing in as Federal Reserve chairman in 2006 marked the end of Alan Greenspan's long legendary career. To date the new chair has garnered mixed reviews. Business economists see him as the best qualified successor to Greenspan while many traders and investors worry that he's too academic for the job. Meanwhile many ordinary Americans do not even know who he is. How will Bernanke's leadership affect the Fed's actions in the coming years? How will Bernanke build on Greenspan's success but also put his own stamp on the Fed? What will all this imply for businesses and investors? In *Ben Bernanke's Fed* Ethan Harris provides exceptional insights into these crucial issues. As a leading Fed watch economist Harris draws on Bernanke's academic research, his speeches as a governor of the Fed and his first two years on the job to shed light on how the Federal Reserve analyzes and manages the economy using a synthesis of classical and Keynesian theory. Bernanke's strategies for fighting inflation. The implications of the new chair's remarkably plain spoken style. How Bernanke has cultivated diverse viewpoints but still builds consensus within the Fed. Engaging and discerning this book demystifies the man who has stepped into what many describe as the second most powerful job in America.

**Power and Influence of Economists** Jens Maesse, Stephan Pühringer, Thierry Rossier, Pierre Benz, 2021-05-23 Economists occupy leading positions in many different sectors including central and private banks, multinational corporations, the state and the media as well as serving as policy consultants on everything from health to the environment and security. *Power and Influence of Economists* explores the interconnected relationship between power, knowledge and influence which has led economics to be both a source and beneficiary of widespread power and influence. The contributors to this book explore the complex and diverse methods and channels that economists have used to exert and expand their influence from different disciplinary and national perspectives. Four different analytical views on the role of power and economics are taken: first the role of economic expert discourses as power devices for the formation of influential expertise; second the logics and modalities of governmentality that produce power/knowledge apparatuses between science and society; third economists as involved in networks between academia, politics and the media; and fourth economics considered as a social field including questions of legitimacy and unequal relations between economists based on the detention of various capitals. The volume includes case studies on a variety of national configurations of economics such as the US, Germany, Italy, Switzerland, Greece, Mexico and Brazil as well as international spaces and organisations such as the IMF. This book provides innovative research perspectives for students and scholars of heterodox economics, cultural political economy, sociology of professions, network studies and the social studies of power, discourse and knowledge.
