Bio-Climatology for Built Environment Masanori Shukuya, 2019-01-18 Indoor climate is determined by rational lighting heating cooling and ventilating systems For occupants well being it should be consistent with how regional outdoor climate works in the flow of radiation via four paths of heat transfer radiation convection conduction and evaporation This book starts with the relationship between the human body and its immediate environmental space followed by a brief introduction of passive and active systems for indoor climate conditioning The nature of light and heat is discussed with a focus on building envelope systems such as walls and windows and then examined from the viewpoint of thermodynamics and human biology Some examples are given to enable a better understanding of luminous and thermal characteristics of our most immediate environment particularly for those professionally involved in environmental planning designing and engineering to know about bio climatic design principle *Neurons, Axons, Dendrites, Synapses, and Memory: My Life* Jose Morales

Dorta,2019-07-22 This is a detailed clear simple and interesting academic and intellectual trip into neuron axons synapses and their bases in memory formation and learning The author goes after the origin of his first primordial memory in an attempt to find and nurture his own identity and personality Memories can be categorized as working memory short term memory and long term memory In addition we have conscious unconscious toxic automatic and uncategorized memory such as adoptive memory in the immune system puzzling but challenging memory during matching nucleotides and amino acids T cells memory recognize identify and destroy pathogens among billions of cells genes and proteins packaging for self protection and function Long term unconscious memory is just the tip of the iceberg when it comes to cognitive memory Further exploring his initial objective the primordial memory the author encounters the electrical and chemical reactions coming under the domain of genes without ignoring DNA Last but not least is memory of love from birth till death It is encoded in a memory that encompasses my whole body *Origins of the Universe, Life and Species* Plammoottil

Cherian,2018-03-22 The relationship between science and theology has been a crisis for humanity since Darwin s publication of Origin of Species that affects the very core of scientific and Biblical truths with serious consequences In this detailed and absorbing book Dr Cherian provides astounding facts of science that were deciphered in the last 500 years each of which is recorded in the Biblical Scriptures Heeding back to the Biblical account of creation Dr Cherian takes the readers from the erroneous notion of the origin of the universe without a cause and abiogenesis as the source of life to the latest scientific discoveries that corroborate the Biblical evidence for divine creation of the universe life and species that dispel Darwinian evolution The Origins of the Universe Life and Species sheds much light for a better understanding of the Scriptures that were hidden to many scientists researchers and students to relate the scientific discoveries that reveal the Biblical truths for a better appreciation of the unknown God who reveals himself through the many scientists and their discoveries Dr Cherian uses all branches of science from astronomy to zoology connecting the dots between science and theology that stretches from the highest of heavens outer space to the deepest of ocean floor revealing the unknown God to be the KNOWN GOD

The Antisocial Mind
Ghahreman Khodadad,2024-10-16 In this book Professor Ghahreman Khodadad illuminates the basis of human behavior by examining the structures that underline antisociality The book s central thesis is that antisocial people are so thanks to biological and neurological structures The principle of structure to function is used to argue that the brain without us being conscious of it produces our behaviors If this claim is correct then antisocial individuals are not accountable for their antisocial behavior and they should be treated respectfully instead of being punished Furthermore prisons should accordingly be converted into rehabilitation treatment and behavioral research centers This is a book for the general reader who is

interested in the basis of human behavior It should also be of interest to psychologists psychiatrists neuroscientists geneticists neurobiologists and philosophers
